**A Guide to Energy Management in Buildings** Douglas Harris, 2016-11-29 This new edition of A Guide to Energy Management in Buildings begins by asking why we need to control energy use in buildings and proceeds to discuss how the energy consumption of a building can be assessed or estimated through an energy audit It then details a range of interventions to reduce energy use and outlines methods of assessing the cost effectiveness of such measures Topics covered include where and how energy is used in buildings energy audits measuring and monitoring energy use techniques for reducing energy use in buildings legislative issues And new in this edition the cooling of buildings fuel costs and smart metering and education and professional recognition It provides a template for instigating the energy management process within an organization as well as guidance on management issues such as employee motivation and gives practical details on how to carry the process through This book should appeal to building and facilities managers and also to students of energy management modules in FE and HE courses

**Metric Handbook** Pamela Buxton, 2018-02-23 Significantly updated in reference to the latest construction standards and new building types Sustainable design integrated into chapters throughout Over half of the entire book has now been updated since 2015 Over 100 000 copies sold to successive generations of architects and designers This book belongs in every design office The Metric Handbook is the major handbook of planning and design data for architects and architecture students Covering basic design data for all the major building types it is the ideal starting point for any project For each building type the book gives the basic design requirements and all the principal dimensional data and succinct guidance on how to use the information and what regulations the designer needs to be aware of As well as buildings the Metric Handbook deals with broader aspects of design such as materials acoustics and lighting and general design data on human dimensions and space requirements The Metric Handbook is the unique reference for solving everyday planning problems

**Attachment Ventilation Theory** Angui Li, 2023-05-02 This open access book systematically summarizes the current research progress of attachment ventilation covering vertical wall attachment column attachment and adaptive attachment ventilation Attachment ventilation is a high performance ventilation mode that was first proposed by the author Prof Angui Li 20 years ago Now it has been widely used in office spaces subway stations high speed railway stations international airport terminals and other large spaces This book introduces attachment ventilation in detail to eliminate the cooling heating load of the occupied zone and provide an expected environment for the air conditioned zone Attachment ventilation combines the advantages of traditional mixed ventilation and displacement ventilation This book consists of six chapters covering a series of airflow patterns mechanisms parameter correlations and attachment ventilation design methods It is helpful for HVAC engineers to design attachment ventilation effectively

**CIBSE Guide B: 2016**, 2016 Combined index to CIBSE Guides 2016 B1 Heating including hot water systems and an appendix on hydronic systems which is also applicable to chilled water systems B2 Ventilation and ductwork B3 Air conditioning and refrigeration B4 Noise

and vibration control for building services systems applicable to all systems Each chapter has an individual index but to facilitate cross referencing this combined index allows for navigation of topics across the complete Guide Page references are indicated by a prefix defining the chapter and a suffix referring to the page number For instance 1 22 represents chapter 1 page 22

**Energy Policy Design in the Eastern Mediterranean Basin** Bertug Ozarisoy,Hasim Altan,2023-09-28 This book explores energy consumption and thermal comfort in the social housing sector in the Eastern Mediterranean basin This book presents a novel methodological framework for the optimisation of post war social housing developments in the Eastern Mediterranean climate The authors draw on semi structured interviews to present evidence on in situ thermal sensation and provide the results of walk through and walk in thermographic surveys to highlight building fabric performance and highlight anomalies in the building envelopes The authors go on to show how this data informed retrofit design solution can be applied to reduce household energy consumption increase awareness of domestic energy use and inform effective policymaking decisions in energy use in the Eastern Mediterranean basin including the development of Energy Performance Certificate schemes This book will be of great interest to students and scholars of energy policy energy efficiency and planning It will also assist architects building engineers and other practitioners in closing the gap between the current understanding and the actual performance of existing residential building stocks in the Eastern Mediterranean basin

**Principle, Design and Optimization of Air Balancing Methods for the Multi-zone Ventilation Systems in Low Carbon Green Buildings** Xin Zhang,Can Cui,Wen-Jian Cai,Hui Cai,Gang Jing,2022-10-17 This book presents a systematic study on the air balancing technologies in heating ventilation and air conditioning HVAC systems Several modern air balancing methods including advanced control based air balancing data driven based air balancing and energy saving oriented air balancing are introduced in this book to balance the air duct system Furthermore this book provides clear instructions for both HVAC designers and engineers as well as researchers on how to design and balance duct systems for improved performance and energy efficiency

CIBSE Guide. Volume C Chartered Institution of Building Services Engineers,1974 Air Conditioning Systems Roger Colby Legg,1991 The efficient use of energy resources both for economic and environmental reasons will remain a top priority for the foreseeable future Roger Legg s comprehensive treatment of air conditioning systems is devoted to ensuring that when installed they not only meet their design criteria but maximize energy efficiency
