tool must be infinitely flexible which MongoDB is At the same time this flexibility does come with a small learning curve and that is why this book exists We aim to provide people with a great way to look at many of the core storage features of MongoDB To do this we have eschewed some of the more complex operational features such as Sharding and Replication we also avoided going into depth with a lot of the operations level mechanics **Handbook of Systems Engineering and Risk Management in Control Systems, Communication, Space Technology, Missile, Security and Defense Operations** Anna M. Doro-on,2022-09-27 This book provides multifaceted components and full practical perspectives of systems engineering and risk management in security and defense operations with a focus on infrastructure and manpower control systems missile design space technology satellites intercontinental ballistic missiles and space security While there are many existing selections of systems engineering and risk management textbooks there is no existing work that connects systems engineering and risk management concepts to solidify its usability in the entire security and defense actions With this book Dr Anna M Doro on rectifies the current imbalance She provides a comprehensive overview of systems engineering and risk management before moving to deeper practical engineering principles integrated with newly developed concepts and examples based on industry and government methodologies The chapters also cover related points including design principles for defeating and deactivating improvised explosive devices and land mines and security measures against kinds of threats The book is designed for systems engineers in practice political risk professionals managers policy makers engineers in other engineering fields scientists decision makers in industry and government and to serve as a reference work in systems engineering and risk management courses with focus on security and defense operations **Big Data – BigData 2019** Keke Chen,Sangeetha Seshadri,Liang-Jie Zhang,2019-06-19 This volume constitutes the proceedings of the 8th International Congress on BIGDATA 2019 held as Part of SCF 2019 in San Diego CA USA in June 2019 The 9 full papers presented in this volume were carefully reviewed and selected from 14 submissions They cover topics such as Big Data Models and Algorithms Big Data Architectures Big Data Management Big Data Protection Integrity and Privacy Security Applications of Big Data Big Data Search and Mining Big Data for Enterprise Government and Society Human Language Technologies – The Baltic Perspective Jurgita Vaicenoniene,Jolanta Kovalevskaite,Danguole Kalinauskaite,2020-09-15 Human language technology is the study of the methods by which computer programs or electronic devices can analyze produce modify or respond to human texts and speech It consists of natural language processing and computational linguistics on the one hand and speech technology on the other This book presents the proceedings of the 9th International Conference Human Language Technologies The Baltic Perspective Baltic HLT 2020 organised in Kaunas Lithuania on 22 and 23 September 2020 This biennial conference offers researchers a platform to share knowledge on recent advances in human language processing for the Baltic languages as well as promoting interdisciplinary and international cooperation in human language technology research within and beyond the Baltic States In addition to the traditional topics of natural language processing and

language technologies this year s conference featured a special session on resource and tool development for teaching and learning the less resourced Baltic languages This year 42 submissions were received each of which was evaluated by two reviewers resulting in a total of 34 papers being accepted for presentation and publication The book is divided into four sections speech and text analysis 9 papers machine translation and natural understanding 6 papers tools and resources 14 papers and language learning resources 5 papers Providing a fascinating overview of current research in the field from a primarily Baltic perspective the book will be of interest to all those whose work involves human language technology
