A New Approach to Reading Videogames as Story Thomas Rowland, 2026-01-27 This book introduces a new methodology for understanding videogames with particular attention to three types of videogames toy games storybook games and ludonarratives This methodology pulls from phenomenological and deconstructionist roots informed by medieval studies and the history of reading to emphasize how important playing stories can be as a form of narrative This book explores the idea of storyplaying in connection with new ideas on intramersive movement game mechanics and sacred play to develop a typology of videogames that will enable critics educators and theorists to situate videogames within a broad continuum of literary history Building on this foundation this book continues by exploring additional facets of this methodology by exploring the relationship between videogames and film criticism the emerging art world of game mediated photography the various economies constructed around videogames the potential of games to serve as third places and some suggestions for videogames in the classroom These ideas are contextualized by the author's argument that videogames serve a purpose akin to the original function of medieval cathedrals as intentional virtual spaces with dedicated and important meditation which given today's decadent cultural and political climate underscores the urgency of recognizing videogames as being vital to our scholarly and educational enterprises

Winchester in the Early Middle Ages Frank Barlow,1976 London and Winchester were not described in the Domesday Book but the royal properties in Winchester were surveyed for Henry I about 1110 and the whole city was surveyed for Bishop Henry of Blois in 1148 These two surveys survive in a single manuscript known as the Winton Domesday and constitute the earliest and by far the most detailed description of an English or European town of the early Middle Ages In the period covered Winchester probably achieved the peak of its medieval prosperity From the reign of Alfred to that of Henry II it was a town of the first rank initially centre of Wessex then the principal royal city of the Old English state and finally capital in some sense but not the largest city of the Norman Kingdom In this book a team of scholars from Britain and Sweden centred on the Winchestre Research Unit have undertaken a full edition translation and analyses of the surveys and of the city they depict Drawing on the evidence derived from archaeological excavation and historical research in the city since 1961 on personal and place name evidence and on the recent advances in Anglo Saxon numismatics they provide an unparalleled account of one of the principal European cities of the eleventh and twelfth centuries **Archives**
