Communications R. W. Burns,2004 Communications An international history of the formative years traces the evolution of communications from 500 BC when fire beacons were used for signalling to the 1940s when high definition television systems were developed for the entertainment education and enlightenment of society The book does not simply provide a chronicle of dates and events nor is it a descriptive catalogue of devices and systems Rather it discusses the essential factors technical political social economic and general that enabled the evolution of modern communications The author has taken a contextual approach to show the influence of one discipline upon another and the unfolding story has been widely illustrated with contemporary quotations allowing the progress of communications to be seen from the perspective of the times and not from the standpoint of a later generation Collier's ,1917 Financial World ,1924 **The Sibley Journal of Engineering** ,1931 Automotive Industries ,1924 Automotive Replacements ,1924
