## Media Sensation Reddit Discussions:

Youth Digital Health and Online Platforms Martyna Gliniecka,2024-12-27 Youth Digital Health and Online Platforms focuses on young people's use of the digital platform Reddit for health. Drawing upon dialogism theory, the book explores how young people produce a youth-led discourse of youth digital health different from the adult-led framing represented in youth digital health research, policy, and service delivery. Peer-led discussions online remain one of the controversial forms of youth digital health associated with negative peer influence or casual teenage talk. This book argues that online peer-led dialogues support young people's agency in health and that young people can benefit from dealing with health issues with peers. The work is based on the digital ethnography of teenagers' subreddits on Reddit and utilises a theoretical framework of dialogism, a linguistic-based theory originated by an early 20th century Russian philosopher, Mikhail Bakhtin. The book introduces the concept of dialogical youth-led youth digital health discourse formed in the peer-led space of Reddit. This youth-led discourse celebrates equality and diversity amongst people's meanings and opinions. It is constructed around three relational elements: socio-material affordances, creative practices, and a plurality of youth voices. Reddit's pseudonymous, anti-authoritarian, and egalitarian nature supports the emergence of this youth-led discourse. The book can interest scholars and lecturers in childhood and youth studies, Internet studies, and youth health studies. Professionals such as policymakers, service designers, deliverers, online safety educators, and global youth and health agencies can use evidence-based insights in their work with young people.

*Contemporary Challenges to Identity Politics* Kire Sharlamonov, Natalija Shikova, 2026-01-01 This upper-level textbook offers a comprehensive interdisciplinary exploration of the complex entanglements between identity formation and political life in the 21st century. Bridging sociology, political science, and law, the book interrogates how identity is constructed, contested, and mobilized within political arenas. From the philosophical underpinnings of identity to its role in the justification of collective rights, the book systematically traces the evolution of identity politics and its influence on legal frameworks, public discourse, and digital culture. In nine chapters, the volume covers diverse themes: the ontological roots of identity, the tensions between liberalism and multiculturalism, the communicative dynamics of political identity in campaigns, the environmentalist aspects of identity, and the legal mechanisms supporting collective rights. Particular attention is paid to the digital realm, where algorithmically mediated interactions reshape identity and intensify polarization. This is an essential resource for advanced students and scholars in political sociology, legal studies, and political theory, providing both foundational insight and contemporary relevance in a rapidly shifting political landscape.

**Gaming Democracy** Adrienne L. Massanari, 2024-10-29 How play and gaming culture have mainstreamed far-right ideology through social media platforms. From Gamergate to the ongoing Big Lie, the far-right has gone mainstream. In *Gaming Democracy*, Adrienne Massanari tracks the flames of toxicity found in the far-right and alt-right movements as they increasingly take up oxygen in American and global society. In this pathbreaking contribution to the fields of internet studies, game studies, and gender studies, Massanari

argues that Silicon Valley's emphasis on meritocracy and free speech absolutism has driven this rightward slide. These ideologies have been coded into social media spaces that implicitly silence marginalized communities and subject them to rampant abuse by groups that have learned to game the ecology of platforms algorithms and attention economies. While populist movements are not new phenomena such as QAnon, parental rights activism and COVID denialism are uniquely of the internet with supporters demonstrating both technical acumen and an ability to use memes and play as a way of both building community and fomenting dissent. Massanari explores the ways that the far right uses memetic humor and geek masculinity as tools both to create a sense of community within these leaderless groups and to obfuscate their intentions. Using the lens of play and game studies as well as the concept of metagaming, Gaming Democracy is a novel contribution to our understanding of online platforms and far right political activism.

### **Loving Our Enemies Through Seasons of Bitterness**

Lex Kohn, 2025-06-30 In a nation crumbling under the weight of bitterness where government is the people's god the way through is neither legislation nor activism but loving the least loveable. A study of internet influence, conflict theory and nineteenth century wisdom reveals that people do not have to solve their disagreements if they can relearn how to love their enemies as Christ commanded. This book highlights courageous men and women of faith from biblical times up through the present who obeyed this commandment the Scriptures they followed and how they managed it so that people today too might learn to substitute love instead of bitterness.

**Dis.Ordering Distribution** Cornelia Storz, Vinzenz Hediger, Matthias Krings, 2025-09-23 Dis Ordering Distribution explores the intricate relationship between distribution and production drawing on empirical evidence from two vibrant centers of cultural production Africa and Asia.

### Debates for the Digital Age

Danielle Sarver Coombs, Simon Collister, 2015-11-23 By evaluating the Internet's impact on key cultural issues of the day this book provides a comprehensive overview of the seismic technological and cultural shifts the Internet has created in contemporary society. Books about Internet culture usually focus on the people, places, sites and memes that constitute the cutting edge at the time the book is written. That approach alas renders such volumes quickly obsolete. This provocative work on the other hand focuses on overarching themes that will remain relevant for the long term. The insights it shares will highlight the tremendous impact of the Internet on modern civilization and individual lives well after specific players and sites have fallen out of favor. Content is presented in two volumes. The first emphasizes the positive impact of Internet culture for example 24 hour access to information, music, books, merchandise, employment opportunities and even romance. The second discusses the Internet's darker consequences such as a demand for instant news that often pushes journalists to prioritize being first over being right, online scams and invasions of privacy that can affect anyone who banks, shops, pays bills or posts online. Readers of the set will clearly understand how the Internet has revolutionized communications and redefined human interaction coming away with a unique appreciation of the realities of today's digital world for better and for worse.

Kenneth Kushner,Averil McClelland,Hyla Kushner,Philip L. Safford,2021-03 It is difficult to fathom the myriad changes that have occurred and that influence the content of this book in just three years since the previous edition As this book goes to press we have witnessed many nations in Europe as well as the United States that have made dramatic political shifts from open and liberal leanings to more populist nationalistic and conservative ideologies These shifts have been accompanied by an increase in xenophobia and stricter actions to reduce immigration often accompanied by a rise in anti immigrant anti Semitic and Islamophobic sentiment The conflicts and struggles in Afghanistan Iraq and Syria continue as tensions between the United States and Russia fester A questioning of Truth with an onslaught of fake news has emerged having a major influence on the 2016 U S presidential election And we expect numerous changes to occur under the new U S Secretary of Education Betsy DeVos And these challenges are in the political arena alone Across the planet people continue to feel the stresses of the seemingly endless changes and challenges they confront on many fronts Climate change continues to advance resulting in new and unpredictable weather patterns despite a vocal minority that appears to deny its existence Although making gains people continue to wrestle with questions surrounding same sex marriage and gay rights the question of health care the accelerated identification of children with autism and other disabilities as well as our aging population span cultural differences and cut across geographic political and social boundaries continuing to impact us all at the local national and global levels Some people are eager to embrace innovation and change while others struggle through a variety of political and social means to retain older and more traditional ways of doing things Such challenges continue to enter and impact our increasingly culturally diverse classrooms and communities To effectively address and solve the multitude of issues we face it is incumbent upon teachers to provide young people with a foundation that will assist them to better understand the complex

nature of the world in which they will live while developing the skills that will enable them to be proactive problem solvers in an interdependent global society. This requires people who have the knowledge, skills and motivations to reach beyond their own cultural boundaries and a willingness and ability to collaborate with others. If people are not willing and able to do so, these and other future problems simply will not be solved. Developing intercultural understanding and competence must be actively addressed throughout the school curriculum. This tenth edition of *Human Diversity in Education: An Intercultural Approach* continues to focus on the preparation of teachers and other human service providers who can interact effectively with the wide diversity of people they are certain to encounter and who are able to transmit this knowledge and skill to the individuals in their charge.
