Chapters in this book cover need to know information about nutritional science with direct application to the nursing process. This book provides a comprehensive overview of nutritional principles and delves into building block elements: macronutrients and micronutrients and basics of nutritional biochemistry to provide the reader with a clear concise explanation of nutritional principles. Individual chapters focus on developmental areas of nutrition across the lifespan, nutritional therapeutics, nutritional support and therapeutic diets and nutritional supplements. The last chapter examines the nutritional management of clients who experience multisystem disorders. This book is intended for use as one resource in managing a client's nutritional status and should be used in conjunction with appropriate referrals and collaboration with registered dietitians to provide client care and determine specific nutritional outcomes.

Educational Psychology

Thomas Fetsco, John McClure, 2005. I applaud the vision the authors had in synthesizing this information in a way that makes the reader more confident in their application of these theories and principles to their own classrooms. The authors have wonderfully succeeded in their attempt to integrate this material in a manner quite different from other texts I've read or reviewed. Jim Persinger, Emporia State University. Any textbook that overemphasizes theory neglects the real world; any textbook that overemphasizes practice neglects the underlying foundation of theory. This book strikes a careful balance between theory and practice by explicitly linking the two. Gregory Cutler, Bay de Noc Community College. By far this is the best educational psychology text I have read because it integrates and applies major learning theories to many of the daily issues future teachers will face. Krista Robertson, Rhode Island College. I see this textbook as well written, informative, clearly and logically organized, and a very useful component for a course in Educational Psychology. I like it. Raymond E. Webster, East Carolina University. The authors have done an excellent job in producing an easy to follow format and style. Paula Holmes Miller, Crichton College. The authors' writing style and presentation level are clear and easy to read, along with tables, figures, concept maps, and other visual aids. Yuliang Liu, Ph.D., Southern Illinois University. The text is well written and some very difficult topics such as Attribution Theory and Constructivism to name just two are easy to understand when compared to similar books. I think this is some of the clearest writing I have read in a long time. Michael P. Verdi, California State University, San Bernardino. I really enjoyed reading this text and I found its comprehensive nature to be a strength. Linda W. Morse, Mississippi State University. The authors' writing style is clear, simple, and direct. It speaks directly to the reader; the examples are concrete and related to education. John Isch, Martin Luther College.
