

1. Production Process Characterization

The typical development team spends time to plan and conduct a Production Process Characterization Study (PPCS) to understand key processes. This study leads to model-based learning principles and methods, models to design a manufacturing process and to guide manufacturing activities. The study leads to design at least an analytical data collection or demonstration studies and then to improve and repeat the study. The key objectives of the study are to provide detailed examples of several manufacturing processes.
