

Name \_\_\_\_\_ Date \_\_\_\_\_

# Day 1

Week 5

Nearly all plants in the plant kingdom are autotrophs. Autotrophs are the only living organisms that produce their own food. Plants are all powered by the Sun. They are able to make their own food by converting gases and chemicals within their leaves into food. Sunlight provides the energy for the process that the plants use to make their food, photosynthesis.

## Details

1. Based on the text, how are autotrophs different from other organisms?

## Vocabulary

2. What is an autotroph?

# Day 2

For many plants, adequate water supply depends on a good aquifer, underground water source. Groundwater is the name given to sources of water that are beneath the soil. In fact, more freshwater is located beneath the soil than in lakes and streams. Using a long taproot and smaller branching roots, plants such as switchgrass tap underground sources of water when only small amounts are available near the surface.

## Cause and Effect

1. How do water plants get their water and nutrients?

## Inference

2. What is the main significance of groundwater for plants with deep roots?

# Daily Science Practice

**Mei-Hung Chiu**

## **Daily Science Practice:**

180 Days™: Science for Sixth Grade Bebra Bayne, Lauren Homayoun, 2018-04-02 Help sixth grade students improve their science knowledge with fun and effective daily practice activities 180 Days Science for Sixth Grade Uses daily activities to explore the three strands of science life physical and earth and space Motivates students with quick independent learning activities focusing on building content knowledge analyzing data and communicating results Makes at home learning whole class instruction or small group support quick and easy Includes standards based activities easy to follow instructions and an answer key to quickly assess student understanding Parents appreciate the teacher approved activity books that keep their child engaged and learning Great for homeschooling to reinforce learning at school or prevent learning loss over summer Teachers rely on the daily practice workbooks to save them valuable time The ready to implement activities are perfect for daily morning review or homework The activities can also be used for intervention skill building to address learning gaps Aligns to Next Generation Science Standards NGSS

**Science Communication Practice in China** Fujun Ren, Lin Yin, Gauhar Raza, 2021-11-26 China has made remarkable and rapid progress in the area of science communication both in theory and practice This book critically examines all aspects of science communication practices in China Dealing with major turning points since the introduction of the Science and Technology Popularization Law and the Outline of the National Scheme for Scientific Literacy the book tells a success story by scrutinizing structural changes in science communication policies education system construction and efficacious utilisation of science popularisation facilities and creative use of a mix of traditional and modern channels of communication The book also gives an in depth analysis of the monitoring and evaluation mechanism which constitutes the backbone of the national science communication project The historical roots of science communication in China include shifts in methodologies policy instruments effectual approaches and resultant practices since the days of initial efforts to popularise modern scientific ideas However the primary focus of the book remains on the initiatives launched at the turn of the present century Without losing sight of the national dimensions each chapter of the book draws from provincial as well as grassroots level experiences Quantitative and qualitative methods have been used to analyse strengths weaknesses hurdles and the efficacy of corrective measures This book offers a remarkable insight to anyone who is interested in probing the causal relationship between science communication and China's transformation into a modern society The primary objective of the book is to analyse the nature of science communication with Chinese characteristics and the specificity of the socio cultural environment in which Science and Technology is located Though the book is of particular interest to scholars researchers students and practitioners of science communication the narrative style makes it accessible to the general reader who is interested in science society relationship
