Memes in Frame-Semantic Perspective Niels Brause, 2017-03-07 Bachelor Thesis from the year 2016 in the subject English Language and Literature Studies Linguistics grade 1 3 University of Duisburg Essen Department of Anglophone Studies language English abstract One cannot escape them because they are everywhere There is scarcely a day without one coming across them They are a humorous picture a witty message or a funny video you find on the internet They are in our newsfeed on our message boards or in personal messages from our friends These sources of entertainment seem to be by now an important element of today's web society and there is a huge number of image boards like 9gag.com or reddit.com which have no other purpose than satisfying our needs for these sources of entertainment Even a growing number of newspapers have started to include this type of content in their online platforms A term that is often used to describe this accumulation of different visual entities is the term memes but this term is vague and ambiguous and it does not specifically say what kind of phenomena are included in it This bachelor thesis is an attempt to establish these phenomena labelled as memes as valuable objects for linguistic studies It will glance at several linguistic theories and check their relevance for analysing image macros as representatives for memes in general Finally it will analyse image macros by using the frame semantic framework thus integrating the former accomplished insights in one theoretic framework with only a few central terms This will support the thesis that frame semantics is capable of describing the patterns of encyclopaedic knowledge needed in order to understand complex bimodal entities

Riddle, 1992 All too often ancient herbal and other remedies have been dismissed as simply folklore of no relevance to medical science John Riddle's approach however has been to explore the history of drugs with the hypothesis that ancient and medieval medicines were effective a methodology that he expounds in the final essay hitherto unpublished Indeed he shows both from detailed case studies and from the comparison of the listings given by classical and medieval authorities with those in modern pharmacopoeias that our ancestors had discovered and made effective use of many of the drugs used in medicine today from antiseptics and analgesics to oral contraceptives even chemotherapy for cancer There is the suggestion therefore that more careful examination and identification of the drugs used in the past may reveal chemicals that can be exploited anew Central to these studies is the investigation of how a drug was used and how knowledge about it was transmitted and perhaps also distorted in the process from the Classical world through the Middle Ages Les anciens rem des phytothérapie et autres ont trop souvent été mis aux rangs du folklore et considérés comme n'ayant aucun rapport avec la science moderne L'approche de John Riddle cependant a été d'explorer l'histoire des drogues en prenant pour hypothèse l'efficacité de la médecine ancienne et de valider une méthodologie qu'il expose dans son dernier essai jusqu'à présent jamais publié En effet il démontre à partir de cas d'études de tailles et de la comparaison tabulaire entre les listages fournis par les autorités antiques et modernes et ceux des pharmacopées modernes que nos ancêtres avaient découvert et mis en évidence l'utilisation de nombreux remèdes dont certains sont la médecine ancienne et heure actuelle des antiseptiques et analgésiques aux contraceptifs oraux et modernes jusqu'à la chimiothérapie pour le cancer Sugge
