Clinical Team Meeting Notes:

Troubled Persons Industries Martin Harbusch, 2022-01-13 This book critiques the use of psychiatric labelling and psychiatric narratives in everyday areas of institutional and social life across the globe. It engages an interpretive sociology emphasising the medial and individual everyday practices of medicalisation and their role in establishing and diffusing conceptions of mental abnormality. The reconstruction of psychiatric narratives is currently taking place in multiple contexts many of which are no longer strictly psychiatric. On the one hand psychiatric narratives now pervade contemporary public discourses and institutions through advertising news and internet sites. On the other hand professionals like social workers, teachers, counsellors, disability advisors, lawyers, nurses and/or health insurance staff dealing with psychiatric narratives are becoming servants of the psychiatric discourse within troubled person industries. Abstract academic categories get turned into concrete aggrieved victims of these categorisations and academic formulas turned into individual narratives. To receive support it seems one must be labelled. The practice oriented micro sociological field with which this volume is concerned has only recently begun to integrate itself into public and academic debates regarding medicalisation and the social role of psychiatry. Discussions on the evolution and expansion of official diagnoses within academia and society in general frequently overlook the individualised roles of psychiatric diagnoses and the experiences of those involved and affected by these processes an oversight which this volume seeks to both highlight and address.

Professional Nursing Concepts: Competencies for Quality Leadership Anita Finkelman, 2017-12-01 Professional Nursing Concepts Competencies for Quality Leadership Fourth Edition takes a patient centered traditional approach to the topic of nursing education

Proceedings of the Staff Meetings of the Mayo Clinic Mayo Clinic, 1927 *Fundamentals of Psychiatric Treatment Planning* James A. Kennedy, 2008-05-20 First published in 1992 Fundamentals of Psychiatric Treatment Planning outlines an approach that quickly became the definitive standard for writing treatment plans. Developed by clinical psychiatrist James A. Kennedy this practical intuitive method organizes psychiatric problems into seven categories: psychological impairment, social skills, violence, activities of daily living, substance abuse, medical impairment, and ancillary impairment. Treatment plans are developed using information gathered with the Kennedy Axis V an instrument that has proven more successful than both the Global Assessment of Functioning GAF scale and the Brief Psychiatric Rating Scale BPRS in establishing baselines and determining outcome measures. Fundamentals of Psychiatric Treatment Planning serves as a powerful highly effective tool that promotes a cohesive approach. By using a consistent approach to planning the clinical team works in concert toward uniform goals and outcomes. Helps staff gather critical information to improve outcomes. For establishing baselines and determining outcome measures the Kennedy Axis V instrument has proven more successful than both the GAF and the BPRS. Includes many examples to help staff write their own plans. Rich with real life examples to guide staff including problem names and descriptions, treatment modalities and samples of individual plans for each of the seven problem categories. In
