Cloud Computing Business Trends And Technologies:

Cloud Computing Igor Faynberg, Hui-Lan Lu, Dor Skuler, 2016-01-19 Cloud Computing Business Trends and Technologies provides a broad introduction to Cloud computing technologies and their applications to IT and telecommunications businesses i.e. the network function virtualization NFV. To this end, the book is expected to serve as a textbook in a graduate course on Cloud computing. The book examines the business cases and then concentrates on the technologies necessary for supporting them. In the process, the book addresses the principles of as well as the known problems with the underlying technologies such as virtualization, data communications, network and operations management, security and identity management. It introduces through open source case studies based on OpenStack an extensive illustration of lifecycle management. The book also looks at the existing and emerging standards demonstrating their respective relation to each topic. Overall, this is an authoritative textbook on this emerging and still developing discipline which guides the reader through basic concepts to current practices to state of the art applications. Considers technical standards bodies involved in Cloud computing standardization. Is written by innovation experts in operating systems and data communications each with over 20 years experience in business research and teaching. *Unleashing the Cloud: A Comprehensive Guide to Modern Computing Paradigm*

in the potential of SDNFV systems to address a broad range of network security challenges The work will also be of great benefit to practitioners wishing to design secure next generation communication networks or to develop new security related mechanisms for SDNFV systems *Big Data and Cloud Computing for Development* Nir Kshetri,Torbjörn Fredriksson,Diana Carolina Rojas Torres,2017-03-27 This book provides a framework for evaluating big data and cloud computing based on how they evolve to fit users needs in developing countries in key areas such as agriculture and education The authors discuss how this framework can be utilized by businesses governments and consumers to accelerate economic growth and overcome information and communication barriers By examining the ways in which cloud computing can drive social economic and environmental transformation readers gain a nuanced understanding of the opportunities and challenges these technologies offer The authors also provide an authoritative and up to date account of big data s diffusion into a wide range of developing economies such as Brazil and China illustrating key concepts through in depth case studies Special attention is paid to economic development in the context of the new Sustainable Development Goals formulated by the United Nations introducing readers to the most modern standard of economic evaluation Students of information management entrepreneurship and development as well as policy makers researchers and practitioners will find *Big Data and Cloud Computing for Development* an interesting read and a useful reference source **Business Process on-Demand;**

Studying the Enterprise Cloud Computing and its Role in Green IT Seyed Amir Beheshti,2011-08-24 Master s Thesis from the year 2011 in the subject Engineering Industrial Engineering and Management grade 1 Vienna University of Technology course Business Engineering and Computer Science language English abstract Climate change and the impact it has on our lives have forced many governmental and also non governmental organizations to conceive of new rules regulations and standards to control CO2 and greenhouse gas GHG emissions Calculating the energy efficiency and reducing the electricity consumption in data centers are important steps towards greening the IT in organizations Several studies have shown that by migrating into the cloud companies in most cases could reduce their costs in addition to decreasing their greenhouse gas emissions Unfortunately lack of guidelines and varying and limited services from different cloud providers have made the adoption of appropriate Cloud services a challenge for many organizations In this regard there is a vital need to study and analyze available services from different cloud vendors and provide enterprises with the best solutions available regarding their specific business requirements This thesis focuses on cloud computing and its efficiency for individual organizations It attempts to study the potential benefits of cloud computing by taking the environmental and energy consumption advantages into consideration Cloud Computing is not a new concept and has been a hype term in recent years Cloud computing is based on the available technologies and it is all about using a new term for the existing technologies But the question is why to create a new name for what already exists The answer to this question is closely related to the potential that Cloud computing has for organizations It is all about conversion of capital expenditure CAPEX to the

operational expenditure OPEX and the possible advantages that this conversion could have for any organization that chooses to migrate into the Cloud In the following upon introducing the cloud computing concept and its related technologies business functions and processes information systems available for enterprises are explored Later based on the required business processes and functions of organizations a comprehensive market analysis is carried out For this purpose different cloud providers and their available services are analyzed I developed an ontology for cloud computing based on the market analysis This thesis is an attempt to make the process of mapping business processes functions to cloud services easier by providing organizations with a matrix of cloud services business processes distribution of market and an ontology for cloud computing

will never leave your side Workforce shortage in a digital era. Can 100% remote work attract more qualified candidates?
Huong Hoang Thien, 2023-05-25 Master's Thesis from the year 2023 in the subject Leadership and Human Resources
Recruiting grade 1.0 language English abstract What will happen if there aren't enough talents to fill the market in the future due to the demographical change? This study focuses on the potential of offering 100% remote work to counteract the workforce shortage in Germany. An empirical study has been conducted as an online survey to gain an overview of Germany's 100% remote job market. In a fast-changing world, digital transformation has become an inevitable process for companies to adapt to new technologies and market trends. The digital transformation in Germany has been significantly impacted by the COVID-19 pandemic, positively and negatively. On the one hand, the pandemic forced German companies to embrace new technology more quickly and adapt to remote work. However, on the other hand, it pointed out Germany's weaknesses in digital infrastructures and cybersecurity. Additionally, many German companies face a shortage of workers due to digital transformation. Another reason that causes workforce shortage is demographical change. Companies cannot operate their business correctly, increase revenue, or drive innovations to survive in a competitive market without suitable candidates. Furthermore, the digital revolution shaped the current digital generations as potential workers exhibit different digital behaviors and preferences. Therefore, companies must know them and their work preferences to fill the workforce shortage gap. Remote working as a sub-trend of the mega-trend New Work has become the new standard for workers, especially since the pandemic. However, there aren't any specific regulations regarding remote work in Germany yet. In general, remote work provides workers, e.g., more freedom and a better work-life balance. Nevertheless, remote work also has the downside, such as workers experiencing isolation and loneliness due to the lack of social contact with co-workers, less productivity outside of the office, etc. For companies, offering remote work gives them complete access to the talent pools, including freelancers, as external workers, reducing costs due to fewer offices being more attractive to job seekers. But on the other side, remote leadership has become a big challenge for leaders. Furthermore, companies have to deal more with cyber security. When everything's going remotely, companies have become an easier target of cyber attacks.

The Huawei Way: Lessons from an International Tech Giant on Driving Growth by Focusing on Never-Ending Innovation
Yang Shaolong, 2016-07-29 Model your company's future on the success of tech's quiet giant. BusinessWeek once listed Chinese tech firm Huawei as one of the ten most influential companies on the planet, and Time placed its founder Ren Zhengfei in the top 100 most influential men in the world. Once considered an insignificant upstart bound for failure like so many other early tech companies, Huawei is now a 62 billion company employing 190,000 people worldwide. Huawei's upward trajectory is the classic story of a company that beat all the odds. Founded in 1987 with 20,000 RMB, Huawei took on all the IT powerhouses during times of major market upheaval and has come out on top, all due to the clarity of vision, powerful sense of purpose, and sheer work ethic of its founder. The Huawei Way provides practical lessons on how Ren Zhengfei led his company to a level of success no one in the

world predicted As telecom s old greats like Motorola Nokia and Siemens continue to struggle from the effects of recession Huawei continues to grow because it never stops innovating Its success is self driven because the company reflecting is its founder maintains a relentless dedication R while other companies fueled by fear are scaling down R D to save money Huawei is ramping it up And it s paying off big time Both entertaining and instructive The Huawei Way traces the rise of one of today s greatest tech companies to provide valuable business and management lessons anyone can apply to any company in any industry

Trends and Developments in Entrepreneurial Finance. Implications for a Startup's Signaling Strategy
Alexander Kolloge, 2018-09-10 Bachelor Thesis from the year 2018 in the subject Business economics Investment and Finance grade 1.0 University of Mannheim Chair of Strategic and International Management Prof Dr Matthias Brauer language English abstract The landscape of entrepreneurial finance is currently subject to a process of transformation driven by globalization technological advancements regulatory adjustments and the emergence of winner take all markets These factors jointly pave the way for new forms of financing which differ significantly from traditional forms in terms of investor structure experience and behavior To analyze how startups can ensure financial coverage in the light of these changing conditions this review compares strategies of attracting traditional and new types of investors from a signaling perspective In business practice this topic is highly relevant as many young startups require substantial amounts of external capital to grow but often have no objective firm data to provide to investors Thus the selection of effective soft signals about startup quality preferably aligned with the preferences of the respective investor group can decide about short term survival and long term performance Findings include that the most promising signaling strategies for traditional forms of financing are based on startup characteristics i e what a firm is In contrast the most effective signals for new forms of financing are based on startup actions i e what a firm does Moreover while personal networks have been found to be highly relevant for traditional forms online networks increase the funding prospects for new forms of financing Through a consolidation and analysis of the current state of research in leading management entrepreneurship and finance journals this review aims at providing a comprehensive overview of the issue and identifying avenues for future research
