Cheap Importation Guide 2013:

The Interactive Documentary in Canada Michael Brendan Baker, Jessica Mulvogue, 2024-06-18 Interactive documentary emerged rapidly from a constellation of changing technologies and practices to much excitement yet its history is short and its future uncertain In the mid 2010s Canada was a world leader in the creation of i docs Less than a decade later technological obsolescence has rendered many of these celebrated projects inaccessible while rapid digital innovation continues to change the i doc form and its modes of experience The Interactive Documentary in Canada captures this transitional moment in documentary filmmaking and media production Bringing together a range of historical theoretical and critical approaches this collection examines the past and the imagined future of a nonfiction storytelling phenomenon that has Canadian institutions figures and works at its centre Embracing a polyphonic conception of interactive documentary the volume includes explorations of web based app based installation and virtual reality works that push the boundaries of what is understood as documentary cinema Leading documentary scholars and makers consider the historical and technological contexts of i doc production innovation and exhibition the political and pedagogical potential of the genre the ethics of the i doc experience and the format s future lifespan in the contemporary media landscape The Interactive Documentary in Canada establishes a place for the i doc in the history of Canadian film highlighting the genre s significant impact on the National Film Board of Canada and on contemporary global documentary media Capacity Mechanisms in the EU Energy Market Leigh Hancher, Adrien de Hauteclerc, Malgorzata Sadowska, 2015-09-24 Ensuring an adequate long term energy supply is a paramount concern in Europe EU member states now intervene by encouraging investment in generation capacity offering an additional revenue stream for conventional power plants in addition to the existing heavily subsidised investments in renewable energy sources These capacity remuneration mechanisms or simply capacity mechanisms have become a hot topic in the wider European regulatory debate European electricity markets are increasingly interconnected so the introduction of a capacity mechanism in one country not only distorts its national market but may have unforeseeable consequences for neighbouring electricity markets If these mechanisms are adopted by several member states with no supra national coordination and no consideration for their cross border impact they may cause serious market distortions and put the future of the European internal electricity market at risk This book provides readers with an in depth analysis of capacity mechanisms written by an expert team of policy makers economists and legal professionals It will be a first point of reference for regulators and policy makers responsible for designing optimal capacity mechanisms in Europe and will be an invaluable resource for academics and practitioners in the fields of energy regulation and competition Gender, Nutrition, and the Human Right to Adequate Food Anne C. Bellows, Flavio L.S. Valente, Stefanie Lemke, María Daniela Núñez Burbano de Lara, 2015-12-07 This book introduces the human right to adequate food and nutrition as evolving concept and identifies two structural disconnects fueling food insecurity for a billion people and disproportionately affecting women children and rural

food producers the separation of women's rights from their right to adequate food and nutrition and the fragmented attention to food as commodity and the medicalization of nutritional health Three conditions arising from these disconnects are discussed structural violence and discrimination frustrating the realization of women's human rights as well as their private and public contributions to food and nutrition security for all many women's experience of their and their children's simultaneously independent and intertwined subjectivities during pregnancy and breastfeeding being poorly understood in human rights law and abused by poorly regulated food and nutrition industry marketing practices and the neoliberal economic system's interference both with the autonomy and self-determination of women and their communities and with the strengthening of sustainable diets based on democratically governed local food systems The book calls for a social movement led reconceptualization of the right to adequate food toward incorporating gender women's rights and nutrition based on the food sovereignty framework *Guardians of the Brazilian Amazon Rainforest: Environmental Organizations and*

Development Luiz C. Barbosa, 2015-05-08 The Amazon region is the focus of intense conflict between conservationists concerned with deforestation and advocates of agro-industrial development This book focuses on the contributions of environmental organizations to the preservation of Brazilian Amazonia It reveals how environmental organizations such as Greenpeace Friends of the Earth WWF and others have fought fiercely to stop deforestation in the region It documents how the history of frontier expansion and environmental struggle in the region is linked to Brazil's position in an evolving capitalist world economy It is shown how Brazil's effort to become a developed country has led successive Brazilian governments to devise development projects for Amazonia The author analyses how globalization has led to the expansion of international commodity chains in the region particularly for mineral ores soybeans and beef He shows how environmental organizations have politicized these commodity chains as weapons of conservation through boycotting certain products while other pro-development groups within Brazil claim that such organizations threaten Brazil's sovereignty over its own resources *Capitalism's Crises* Vishwas Satgar, 2015-10-01 The contributors to this volume draw on a non-dogmatic

Marxist approach to explain the systemic and conjunctural dynamics of crisis inherent in global capitalism Their analysis asks what is historically specific to capitalism's crises while avoiding catastrophic or defeatist claims At the same time the volume situates left agency within actual patterns of resistance and class struggle to clarify the potential for transformative change The cycle of resistance strengthened by the World Social Forum and transnational activism is now punctuated by the experience of the Arab Spring the agency of anti-systemic movements left think tanks the Occupy Wall Street Movement labour unions left parties in Europe such as Syriza and Podemos and people's budgeting in Kerala India On the down side we are witnessing the waning of the Workers Party in Brazil and serious challenges for South Africa's once powerful labour movement and still formative social justice activism All these developments are assessed in this volume This is the second volume in the Democratic Marxism series It elaborates on crucial themes introduced in the first volume Marxism in the 21st
