aesthetic potential and performance limits are also be discussed Presents valuable definitions that are given to explain the characteristics requirements and differences between zero energy green and smart buildings Contains particular focus on the next generation of construction materials and the most advanced products currently entering the market Lists both the advantages and disadvantages to help the reader choose the most suitable solution Takes into consideration both design and materials aspects Promotes the existence of new advanced materials providing technical information to encourage further use and reduce costs compared to more traditional materials

New Container Architecture Jure Kotnik, 2013 GUIDELINES a comprehensive technical introduction lays out all the aspects that the architect will need to consider when designing with these highly versatile elements CASE STUDIES This volume presents the findings of various years of research into container architecture showcasing a wealth of projects with full colour photographs detailed commentaries and resource lists Bursting with great ideas and innovative solutions it is a must have for design students and architects who want to stay in the vanguard of their profession

Shipping Container Craig Martin, 2016-01-28 Object Lessons is a series of short beautifully designed books about the hidden lives of ordinary things The shipping container is all around whizzing by on the highway trundling past on rails unloading behind a big box store even as you shop there clanking on the docks just out of sight 90% of the goods and materials that move around the globe do so in shipping containers It is an absolutely ubiquitous object even if most of us have no direct contact with it But what is this thing Where has it been and where is it going Craig Martin's book illuminates the development of containerization including design history standardization aesthetics and a surprising speculative discussion of the futurity of shipping containers Object Lessons is published in partnership with an essay series in The Atlantic

Beginning Design Technology Mike Christenson, 2015-12-22 Beginning Design Technology introduces how design technologies work together including tools materials and software such as Adobe Photoshop Adobe Illustrator Autodesk AutoCAD and others It teaches you how to think about each design tool whether a software program or physical modelmaking so that you will select one for its strengths for a specific task and know when and how to combine it with other tools Topics include working with building information texturing digital and physical artifacts translating information from one form or file format to another constructing at full scale and making digital and physical models Chapter Summaries exercises discussion questions a glossary an appendix of common software commands and an annotated bibliography will help you find what you need quickly and put the information into practice

Old Buildings, New Forms Francoise Bollack, 2013-11-12 It is clear that working with historic structures is both more environmentally sustainable and cost effective than new architecture and construction and many believe that the best design occurs at the intersection of old and new Fran oise Astorg Bollack presents 28 examples gathered in the United States and throughout Europe and the Middle East Some are well known Mass MOCA Market Santa Caterina in Barcelona Neues Museum in Berlin and others are almost anonymous But all demonstrate a unique and appropriate solution to the problem of adapting historic structures to

contemporary uses This survey of contemporary additions to older buildings is an essential addition to the architectural literature I have always loved old buildings An old building is not an obstacle but instead a foundation for continued action Designing with them is an exhilarating enterprise adding to them grafting inserting knitting new pieces into the existing built fabric is endlessly stimulating Fran oise Astorg Bollack

Small-Scale Public Transportable and Pre-Fabricated Buildings Junjie Xi,2018-04-09 This book investigates the design operation and use of contemporary transportable buildings and explores how functional performance can be assessed in small scale examples for public use alongside their relationship to other design elements The research focuses on three case studies Chengdu Hualin Elementary School Exxopolis and Kreod that do not require a high technology building environment or complex construction skills Transportable buildings are defined as those that are transported in a number of parts for assembly on site Contemporary transportable buildings respond to ecological issues social impacts technological innovation and economic demands They can be used to measure a society s development in environmental sustainability innovation and economic growth through various forms Small scale transportable buildings fulfil many temporary habitation needs in diverse roles such as non emergency transitional housing ephemeral exhibition buildings and seasonal entertainment facilities Small Scale Public Transportable and Pre Fabricated Buildings will be a useful research text for academics and students in architecture design and sustainable building performance
