Contemporary Debates In Metaphysics:

Contemporary Debates in Metaphysics Theodore Sider, John Hawthorne, Dean W. Zimmerman, 2013-05-20 In a series of thought provoking and original essays eighteen leading philosophers engage in head to head debates of nine of the most cutting edge topics in contemporary metaphysics. Explores the fundamental questions in contemporary metaphysics in a series of eighteen original essays, 16 of which are newly commissioned for this volume. Features an introductory essay by the editors on the nature of metaphysics to prepare the reader for ongoing discussions. Offers readers the unique opportunity to observe leading philosophers engage in head to head debate on cutting edge metaphysical topics. Provides valuable insights into the flourishing field of contemporary metaphysics.

Metaphysics Anna Marmodoro, Erasmus Mayr, 2019-03-25 This volume introduces readers to a selected number of core issues in metaphysics that have been central in the history of philosophy and remain foundational to contemporary debates. Issues include substances, properties, modality and essence, causality, determinism and free will. Anna Marmodoro and Erasmus Mayr take a neo-Aristotelian approach both in the selection and presentation of the topics. But Marmodoro and Mayr's discussion is not narrowly partisan; it consistently presents opposing sides of the debate and addresses issues from different philosophical traditions and encourages readers to draw their own conclusions about them.

Problems in Epistemology and Metaphysics Steven B. Cowan, 2020-02-06 Problems in Epistemology and Metaphysics takes a pro and con approach to two central philosophical topics. Each chapter begins with a question: Can We Have Knowledge? How are Beliefs Justified? What is the mind? Contemporary philosophers with opposing viewpoints are then paired together to argue their position and raise problems with conflicting standpoints. Alongside an up-to-date introduction to a core philosophical stance, each contributor provides a critical response to their opponent and clear explanation of their view. Discussion questions are included at the end of each chapter to guide further discussion. With chapters covering core questions surrounding religious beliefs, scientific knowledge, truth, being and reality, this is a comprehensive introduction to debates lying at the heart of what we know, how we know it and the nature of the world we live in.

Contemporary Debates in Philosophy of Mind Brian P. McLaughlin, Jonathan Cohen, 2023-01-31 A timely collection of debates concerning the major themes and topics in philosophy of mind, fully updated with new topics covering the latest developments in the field. Contemporary Debates in Philosophy of Mind provides a lively and engaging introduction to the conceptual background, ongoing debates and contentious issues in the field today. Original essays by more than 30 of the discipline's most influential thinkers offer opposing perspectives on a series of contested questions regarding mental content, physicalism, the place of consciousness in the physical world and the nature of perception and mental capacities. Written to appeal to non-specialists and professional philosophers alike, the second edition of Contemporary Debates in Philosophy of Mind features five entirely new debates on the relation between perception and cognition, whether pain is a natural kind, whether perception is best understood through representational content or direct contact with the world.

whether we need imagination that goes beyond imagery and supposition and whether perceptual contents are general particular or a hybrid Presents 15 sets of specially commissioned essays with opposing viewpoints on central topics in philosophy of mind Offers head to head debates on central topics such as consciousness intentionality normativity mental causation materialism and perception Provides a dynamic view of contemporary thinking about fundamental and controversial issues Includes a thorough introduction providing a comprehensive background to the issues explored in each debate Part of Wiley Blackwell's acclaimed Contemporary Debates in Philosophy series Contemporary Debates in Philosophy of Mind Second Edition is essential reading for undergraduate and graduate students academics professional philosophers and sophisticated general readers with an interest in the subject **The Philosophy of Free Will** Paul Russell,Oisin Deery,2013-04-04 This collection provides a selection of the most essential contributions to the contemporary free will debate Among the issues discussed and debated are skepticism and naturalism alternate possibilities the consequence argument libertarian metaphysics illusionism and revisionism optimism and pessimism neuroscience and free will and experimental philosophy **Problems in Epistemology and Metaphysics** Steven B. Cowan, Problems in Epistemology and Metaphysics takes a pro and con approach to two central philosophical topics Each chapter begins with a question Can We Have Knowledge How are Beliefs Justified What is the mind Contemporary philosophers with opposing viewpoints are then paired together to argue their position and raise problems with conflicting standpoints Alongside an up to date introduction to a core philosophical stance each contributor provides a critical response to their opponent and clear explanation of their view Discussion questions are included at the end of each chapter to guide further discussion With chapters covering core questions surrounding religious beliefs scientific knowledge truth being and reality this is a comprehensive introduction to debates lying at the heart of what we know how we know it and the nature of the world we live in **Debates in the Metaphysics of Time** L. Nathan Oaklander,2014-11-27 A core topic in metaphysics time is also central to issues in the philosophy of science the philosophy of mind and the philosophy of religion Debates in the Metaphysics of Time explores these close philosophical connections and tackles the contemporary debates using an interactive approach Contributors put forward their views before commenting on the ideas of other contributors and defending against objections Divided into metaphysics and time consciousness and time and God time and human freedom chapters are organized around key questions including How are we to understand the passage of time or the change an event seems to undergo when it moves from the future to the present and then recedes into the more and more distant past Can we only be directly aware of what is momentary if we directly experience change and duration How is God related to time and is divine foreknowledge and human freedom compatible For students and researchers looking to understand the latest arguments in the philosophy of time Debates in the Metaphysics of Time provides an original up to date and accessible account of past present and future debates

The Metaphysical Society (1869-1880) Catherine Marshall,Bernard V. Lightman,Richard England,2019 This book

contains essays by important scholars on the historical significance of the Metaphysical Society 1869 1880 The contributors examine the innermost thoughts of the leading intellectuals of the period as they grappled with the changes around them

Current Debates in Sociology & Philosophy Sükrü Aslan,Bora Erdağı,2018 The articles in this book focus on some areas where classical sociology usually leaves out In this respect it is placed in a channel determined by critical sociological approach This channel is an area where thousands of different forms of sociality and acquisitions are collected relations tensions reflections conflicts compromises change transformation etc The sociology of everyday life is also discusses understands and explains the area of socialites that remain in this area It must be noted that the sociology of everyday life not only reveals the place of individuals within the community but also the place of sociality in society The sociological articles of the book in your hand are an example of this approach and initiative In this book you will find two philosophical articles dealing with sociological articles from a more theoretical ground In the modern world we will see that the current philosophy is not as archaic as it might seem but in fact it has important potentials to understand this reified world *Latin American Perspectives on Women Philosophers in Modern History* Christine Lopes,Katarina Ribeiro Peixoto,Pedro

Pricladnitzky,2022-06-21 This book presents Latin American Perspectives on women philosophers comprising selected articles from the First International Conference of Women in Modern Philosophy that took place in Rio de Janeiro City Brazil Latin America in June of 2019 The conference brought together over twenty national transnational and international philosophers from seven countries whose work combines historical and analytical insight to recover the philosophical legacy of women philosophers Historical and analytical work on women s philosophical thought constitute efforts to re conceptualize what counts as philosophical knowledge and re appraise the epistemic relevance of written material that women thinkers produced for most of history This collection and the conference that gave origin to it are testimony to the enduring power of multinational and multicultural philosophical collaboration **On Challenges to Free Will** Bradford Stockdale,2020

Classically the problem of free will has consisted in whether free will is compatible with determinism More recently two other problems for free will have become prominent One is whether free will is incompatible with indeterminism The other problem is whether free will can exist given our ever increasing knowledge of how the brain functions Even if free will is compatible with determinism and indeterminism it may turn out that humans are not the kind of beings that are able to exercise free will due to the types of brains we have I address each of the aforementioned problems in my dissertation In Chapter One I define key terms and provide a brief introduction to the aspects of the free will debate I will focus on In Chapter Two I push back against recent arguments that Frankfurt style cases succumb to the flicker defense and I construct a Frankfurt style case that overcomes the problems posed by this defense In Chapter Three I discuss a version of the problem of luck for the libertarian and I argue that an alleged solution to the problem fails to resolve the problem In Chapter Four I argue that Libet style experiments in as much as they cannot establish epiphenomenalism cannot be used to show that free will does not exist

In the final chapter I summarize my findings *Contemporary Debates in African and Western Philosophy* Monique Whitaker, Jonathan O. Chimakonam, 2025-11-27 The first volume to combine African and Western philosophical approaches to current issues in language logic metaphysics and ethics *Quine, Structure, and Ontology* Frederique Janssen-Lauret, 2020-10-22 W V Quine a champion of philosophical naturalism and pioneer of mathematical logic was one of the most important philosophers of the 20th century Contemporary thought in ontology epistemology and the philosophy of logic and language owes much to his influence yet recent work in these areas has become increasingly dismissive of his views

This is often because of mistaken or overly simplified conceptions of his philosophy which overlook the development of his views over time in particular the growing importance of a kind of structuralism to his system as it evolved This volume provides a fuller richer picture of Quine s views and their development With contributions from leading philosophers in a range of subfields including philosophical logic philosophy of language history of philosophy mathematics philosophy of time and set theory it is the first to investigate Quine s views on structure and how it permeates and shapes his attitude to a range of philosophical questions *Current Controversies in Epistemology* Ram Neta, 2014-05-09 Epistemology is one of the oldest yet still one of the most active areas of philosophical research today There currently exists many annotated tomes of primary sources and a handful of single authored introductions to the field but there is no book that captures epistemology s dynamic growth and lively debates for a student audience In this volume eight leading philosophers debate four topics central to recent research in epistemology The A Priori C S I Jenkins and Michael Devitt The A Posteriori Richard Fumerton and Nicholas Silins The Regress of Justification Declan Smithies and Peter Klein Skepticism Anthony Brueckner and Ernest Sosa

Ram Neta s introduction to the volume descriptions of each chapter annotated bibliographies for each controversy and supplemental guide to further controversies in epistemology with bibliographies help provide clearer and richer views of active controversies for all readers **Debates in Modern Philosophy** Stewart Duncan, Antonia LoLordo, 2013-09-13 Debates in Modern Philosophy Essential Readings and Contemporary Responses provides an in depth engaging introduction to important issues in modern philosophy It presents 13 key interpretive debates to students and ranges in coverage from Descartes Meditations to Kant s Critique of Pure Reason Debates include Did Descartes have a developed and consistent view about how the mind interacts with the body Was Leibniz an idealist or did he believe in corporeal substances What is Locke s theory of personal identity Could there be a Berkeleyan metaphysics without God Did Hume believe in causal powers What is Kant s transcendental idealism Each of the thirteen debates consists of a well known article or book chapter from a living philosopher followed by a new response from a different scholar specially commissioned for this volume Every debate is prefaced by an introduction written for those coming upon the debates for the first time and followed by an annotated list for further reading The volume starts with an introduction that explains the importance and relevance of the modern period and its key debates to philosophy and ends with a glossary that covers terms from both the modern period and the study of

According to the libertarian position on free will people sometimes exercise free will but this freedom is incompatible with the truth of causal determinism Frequently maligned within the history of philosophy this view has recently gained increasingly sympathetic attention among philosophers But stark questions remain How plausible is this view If our actions are not causally determined how can we have control over them Why should we want our actions to be breaks in the deterministic causal chain The recent resurgence of interest in libertarianism is due most significantly to Robert Kane who is the leading contemporary defender of this view of free will This book is a collection of new essays on the libertarian position on free will and related issues that focuses specifically on the views of Kane Written by a distinguished group of philosophers the essays cover various areas of philosophy including metaphysics ethics and philosophy of mind Kane contributes a final essay replying to the criticisms offered in the previous chapters and developing his view in new directions [Proceedings](#)
