12.1 Astronomical Time Periods

• Length of day

- Time it takes for Earth to rotate once
- Actually 4 minutes short of 24 hours
- Sidereal day (related to stars)**: based on when a star reaches its highest point in the sky the following day
 - 23 hours 56 minutes (2 will be the same for any star and is the precise rotation period of the earth)
- Solar day**: based on the time it takes for the sun to make one circuit (2 how long it takes the sun to reach its highest point in the sky the following day)
 - 24 hours + 25 seconds

• Length of month

- Synodic month**: period of the moon's orbit
 - 29.5-day cycle
 - Synodic: meeting (2 the earth and moon meet in the sky at the new moon)
- Sidereal month**: 27.33-day cycle

• Length of year

- Tropical year**: based on the seasons which are measured as time from the March Equinox
- Sidereal year**: earth completes one full orbit relative to the stars
 - 20 minutes shorter than the tropical year

The difference between the sidereal year and the tropical year arises from Earth's elliptical orbit around the sun (eccentricity = 0.0167). The sun is not only changes the orientation of the axis in space but also changes the location of Earth's orbit so about the seasons move. Each year the location of the equinox will move along the orbit about 1/2° of the way around the orbit. If you do the math, you find that 1/2° of a year is about 20 minutes, which explains the 20 minute difference between the tropical year and the sidereal year.

• Planetary periods

- Ratio of the planet's complete orbital period (P_{syn}) to its synodic period (P_{syn}) must equal the ratio of Earth's orbital period (1 yr) to the time required to the "extra" distance

$$\frac{P_{\text{syn}}}{P_{\text{syn}}} = \frac{1 \text{ yr}}{P_{\text{syn}} - 1 \text{ yr}}$$

$$\text{inner planets: } P_{\text{syn}} - P_{\text{syn}} = \frac{1 \text{ yr}}{P_{\text{syn}} - 1 \text{ yr}}$$

$$\text{outer planets: } P_{\text{syn}} - P_{\text{syn}} = \frac{1 \text{ yr}}{P_{\text{syn}} - 1 \text{ yr}}$$

- Sidereal Period**: time a planet takes to orbit the sun relative to distant stars

Alker and IR Renée Marlin-Bennett, 2012-03-12 International Relations have rarely been considered a synthesis of humanistic and social sciences approaches to understand the complex connections of a global and globalizing world One of the few scholars to have accomplished this creative blend was Hayward R Alker Alker and IR presents a set of visionary and original essays from scholars who have been profoundly influenced by Alker's approach to global studies They build on the

foundation he laid demonstrating the practicality and usefulness of ethically grounded theoretically informed and interdisciplinary research for producing knowledge They show how substantive boundaries can be crossed and methodological rules rewritten in the search for a deeper more contextualized approach to global politics This book will be of interest to researchers and students of international relations and global politics

In Defence of Cosmopsychism Khai Wager, 2025-10-16 Is the cosmos itself conscious and could our minds be aspects of its vast overarching consciousness In this ambitious and original study Khai Wager defends cosmopsychism the view that the universe as a whole is conscious and that individual minds like ours derive from this cosmic consciousness Wager situates cosmopsychism within what he calls the landscape of fundamental consciousness bringing it into productive dialogue with closely related views such as panpsychism panqualityism and perennialism The result is a fresh perspective on one of philosophy's deepest puzzles the nature and origin of consciousness The problem of phenomenal consciousness asks how subjective experience can emerge from non-conscious matter Fundamental approaches reject the idea that consciousness arises from non-conscious matter instead proposing that it is present at the most basic level of reality Panpsychism the most prominent such view holds that all fundamental microphysical entities are conscious This however leads to the combination problem how do billions of micro-level minds combine to form distinct macro-level minds like ours Cosmopsychism offers a radical alternative rather than being formed from a combination of micro-level instances of consciousness individual minds derive from a larger cosmic level consciousness As a result cosmopsychism sidesteps the combination problem entirely However a new and equally pressing challenge arises the derivation problem how do individual minds derive from the cosmic consciousness Through rigorous and insightful analysis Wager argues that cosmopsychism can navigate these problems and offers a compelling alternative to both physicalism and panpsychism As such this first book-length treatment of cosmopsychism makes an illuminating contribution to debates about the nature of reality and our place within it

the Bronx Zoo and the Grand Concourse the Bronx was at one time a haven for upwardly mobile second generation immigrants eager to leave the crowded tenements of Manhattan in pursuit of the American dream Once hailed as a wonder borough of beautiful homes parks and universities the Bronx became during the 1960s and 1970s a national symbol of urban deterioration Thriving neighborhoods that had long been home to generations of families dissolved under waves of arson crime and housing abandonment turning blocks of apartment buildings into gutted graffiti covered shells and empty trash filled lots In this revealing history of the Bronx Evelyn Gonzalez describes how the once infamous New York City borough underwent one of the most successful and inspiring community revivals in American history From its earliest beginnings as a loose cluster of commuter villages to its current status as a densely populated home for New York s growing and increasingly more diverse African American and Hispanic populations this book shows how the Bronx interacted with and was affected by the rest of New York City as it grew from a small colony on the tip of Manhattan into a sprawling metropolis This is the story of the clattering of elevated subways and the cacophony of crowded neighborhoods the heady optimism of industrial progress and the despair of economic recession and the vibrancy of ethnic cultures and the resilience of local grassroots coalitions crucial to the borough s rejuvenation In recounting the varied and extreme transformations this remarkable community has undergone Evelyn Gonzalez argues that it was not racial discrimination rampant crime postwar liberalism or big government that was to blame for the urban crisis that assailed the Bronx during the late 1960s Rather the decline was inextricably connected to the same kinds of social initiatives economic transactions political decisions and simple human choices that had once been central to the development and vitality of the borough Although the history of the Bronx is unquestionably a success story crime poverty and substandard housing still afflict the community today Yet the process of building and rebuilding carries on and the revitalization of neighborhoods and a resurgence of economic growth continue to offer hope for the future

T&T Clark Handbook of Suffering and the Problem of Evil Matthias Grebe, Johannes Grössl, 2023-07-13 This wide ranging work provides an extensive exploration of the theology of theodicy asking questions such as should all instances of suffering necessarily be understood as evil Why would an omnipotent and benevolent God allow or perpetrate evil Is God unable or unwilling to reduce human and non human suffering on Earth Does humanity have the capacity to exercise a moral evaluation of God s motives and intentions Conventional disciplinary boundaries have tended to separate theological approaches to these questions from philosophical ones This volume aims to overcome these boundaries by including biblical Part I historical Part II doctrinal Part III philosophical Part IV and pastoral interreligious perspectives and alternative
