Important study of the economic and social history of Ptolemaic Egypt based on the salt tax registers of P Count *The Ancient Egyptian Economy* Brian Muhs,2016-08-02 This book is the first economic history of ancient Egypt covering the entire pharaonic period 3000 30 BCE and employing a New Institutional Economics approach It argues that the ancient Egyptian state encouraged an increasingly widespread and sophisticated use of writing through time primarily in order to better document and more efficiently exact taxes for redistribution The increased use of writing however also resulted in increased documentation and enforcement of private property titles and transfers gradually lowering their transaction costs relative to redistribution The book also argues that the increasing use of silver as a unified measure of value medium of exchange and store of wealth also lowered transaction costs for high value exchanges The increasing use of silver in turn allowed the state to exact transfer taxes in silver providing it with an economic incentive to further document and enforce private property titles and transfers *Counting the People in Hellenistic Egypt* Willy Clarysse,2006

The Firstborn Son in Ancient Judaism and Early Christianity Kyu Seop Kim,2019-01-28 Despite scholars ongoing historical and sociological investigations into the ancient family the right and the status of the firstborn son have been rarely explored by NT scholars and this topic has not attracted the careful attention that it deserves This work offers a study of the meaning of the firstborn son in the New Testament paying specific attention to the concept of primogeniture in the Old Testament and Jewish literature This study argues that primogeniture was a unique institution in Jewish society and that the title of the firstborn son indicates his access to the promise of Israel and is associated with the right of the inheritance i e primogeniture
