The second edition of *Counseling Psychology and Children* takes a multidimensional four-part approach to counseling children. This approach: 1 capitalizes on the relationships children build with parents, teachers, and other adults; 2 looks at children's developmental processes; 3 examines multicultural influences upon them; and 4 takes into consideration the variety of intervention models available. Four chapters examine four major approaches to child therapy: psychodynamic, child-centered, behavioral, cognitive-behavioral, and family systems. In the final synthesizing chapter, the author draws upon his experience as therapist and teacher to bring everything together through a case study that shows his multidimensional approach in action. This book covers the use of play as a therapeutic technique and emphasizes thinking outside the box of standard therapy. It encourages future counselors to view treatment as the culmination of education, developmental, preventive, and remedial interventions. For professionals in the field of counseling children. Journal of Applied Rehabilitation Counseling, 1996.
