## **Counterintelligence Through Malicious Code Analysis:**

**Counterintelligence Through Malicious Code Analysis** ,2007 As computer network technology continues to grow so does the reliance on this technology for everyday business functionality To appeal to customers and employees alike businesses are seeking an increased online presence and to increase productivity the same businesses are computerizing their day to day operations The combination of a publicly accessible interface to the businesses network and the increase in the amount of intellectual property present on these networks presents serious risks All of this intellectual property now faces constant attacks from a wide variety of malicious software that is intended to uncover company and government secrets Every year billions of dollars are invested in preventing and recovering from the introduction of malicious code into a system However there is little research being done on leveraging these attacks for counterintelligence opportunities With the ever increasing number of vulnerable computers on the Internet the task of attributing these attacks to an organization or a single person is a daunting one This thesis will demonstrate the idea of intentionally running a piece of malicious code in a secure environment in order to gain counterintelligence on an attacker
