**U.S. Militarism and the Terrain of Memory** John Bechtold, 2024-08-01 This book analyzes how the Iraqi city of Fallujah became registered as a setting for military heroics in American memory. In 2004 the U.S. military conducted two disastrous assaults in Fallujah, Iraq. More than 1,000 citizens were killed and according to the military's own estimate upwards of 200,000 people were displaced because of the violence. Yet despite this human catastrophe, the kind of information that emerged in the public domain during the battle foregrounded the soldier's experience in war while effacing the destruction of Iraqi bodies. This tendency to foreground the soldier body is a direct result of the military's intervention in what they conceptualize as the information environment. This book draws from the second assault in Fallujah as a case study to explicate the military's investment in this perspectival space which is a consequence both of the mediatization of contemporary war and of the need to influence knowledge considered unfavorable to military operations. In short, the military enlists the media in their targeting process to produce information that is then deployed as a persuasive force to modify the beliefs of specific target populations. When the cultural texts produced by the media are remediated in the public domain after war, they can be thought of as martial constructs because they originated during war through the military's systemized attempt to influence knowledge. That is, these texts trace to a specific battlefield objective. This book reframes the notion of propaganda as a generalized public relations strategy into a more acute and coordinated attempt to decontextualize specific knowledge in the information environment. This book will be of much interest to students of media and communication studies, war studies, memory studies, and international relations.

**Global Communication** Thomas L. McPhail, Steven Phipps, 2019-10-11 Discusses the players, theories, and trends that affect how the world communicates and gets their information. This book is a definitive text on multinational communication and media conglomerates, exploring how global media influences both audiences and policy makers around the world. Comprehensively updated to reflect the many fast-moving developments associated with this dynamic field, this new edition investigates who and where certain cultural products are coming from and why, and addresses issues and concerns about their impact all over the world. Global Communication: Theories, Stakeholders, and Trends, 5th Edition has been thoroughly updated with new content, trends, and conclusions all based on the latest data. The book examines broadcasting, mass media, and news services, ranging from MSNBC, MTV, and CNN to television sitcoms and Hollywood export markets. It investigates the roles of the major players such as News Corp, Sony, the BBC, Disney, Bertelsmann, Viacom, and Time Warner, and probes the role of advertising and the Internet, and their ability to transcend national boundaries and beliefs. New chapters look at the growing importance and significance of other major regions such as the media in the Middle East, Europe, and Asia. Outlines the major institutions, individuals, corporations, technologies, and issues that are altering the international information telecommunication and broadcasting order. Focuses on a broad range of issues including social media and new services like Netflix, as well as Arab

and Asian media. Includes major updates on discussion of the Internet to incorporate global events over the last few years such as Russian use thereof. Facebook Google Looks at how streaming services such as Netflix Amazon Spotify and more have emerged as dominant players in world entertainment. Offers an updated instructor's website with an instructor's manual, test banks and student activities. Global Communication Theories Stakeholders and Trends 5th Edition is intended as an upper level undergraduate text for students in courses on International Global Communication Global Media Journalism and Media Systems in Journalism Communications or Media Studies Departments. *Journalism, Online Comments, and the Future of Public Discourse* Marie K. Shanahan, 2017-09-13. Comments on digital news stories and on social media play an increasingly important role in public discourse as more citizens communicate through online networks. The reasons for eliminating comments on news stories are plentiful. Off topic posts and toxic commentary have been shown to undermine legitimate news reporting. Yet the proliferation of digital communication technology has revolutionized the setting for democratic participation. The digital exchange of ideas and opinions is now a vital component of the democratic landscape. Marie K. Shanahan's book argues that public digital discourse is crucial component of modern democracy one that journalists must stop treating with indifference or detachment and for news organizations to use journalistic rigor and better design to add value to citizens comments above the social layer. Through original interviews, anecdotes, field observations and summaries of research literature, Shanahan explains the obstacles of digital discourse as well as its promises for journalists in the digital age. *Deep Comprehension* Keith K. Millis, Debra Long, Joseph Magliano, Katja Wiemer, 2018-09-25. This volume provides an overview of research from the learning sciences into understanding, enhancing and measuring deep comprehension from a psychological, educational and psychometric perspective. It describes the characteristics of deep comprehension, what techniques may be used to improve it and how deep levels of comprehension may be distinguished from shallow ones. It includes research on personal level variables, how intelligent tutors promote comprehension and the latest developments in psychometrics. The volume will be of interest to senior undergraduate and graduate students of cognitive psychology, learning cognition and instruction and educational technology. *A New Approach to Reading Videogames as Story* Thomas Rowland, 2026-01-27. This book introduces a new methodology for understanding videogames with particular attention to three types of videogames: toy games, storybook games and ludonarratives. This methodology pulls from phenomenological and deconstructionist roots informed by medieval studies and the history of reading to emphasize how important playing stories can be as a form of narrative. This book explores the idea of storyplaying in connection with new ideas on intromersive movement, game mechanics and sacred play to develop a typology of videogames that will enable critics, educators and theorists to situate videogames within a broad continuum of literary history. Building on this foundation, this book continues by exploring additional facets of this methodology by exploring the relationship between videogames and film criticism, the emerging art world of game mediated photography, the various economies constructed around videogames, the potential of

games to serve as third places and some suggestions for videogames in the classroom These ideas are contextualized by the author s argument that videogames serve a purpose akin to the original function of medieval cathedrals as intentional virtual spaces with dedicated and important meditation which given today s decadent cultural and political climate underscores the urgency of recognizing videogames as being vital to our scholarly and educational enterprises
