audiences and ultimately contemporary aesthetic experience. The book argues that more than simply being a container for digital photography, the architecture of Instagram represents a new relationship to the image and to visual experience, a way of shaping ocular habits and social relations. Following a detailed analysis of the structure of Instagram, the tactile world of affiliation follows aesthetics, likes and attention comments. The book examines how art spaces, audiences and aesthetics are key to understanding its rise. The book will be of interest to scholars working in art history, design, digital culture, cultural studies, sociology, education, business, media and communication studies.

Scope and impact of digital marketing

strategies for promoting breast-milk substitutes, 2022-04-28. Digital technologies are increasingly used for marketing food products throughout the world. Although the International Code of Marketing of Breast-milk Substitutes specifies that there should be no advertising or other form of promotion of breast-milk substitutes to the general public, the Code does not directly address many of the specific strategies used in digital marketing. In November 2020, the World Health Assembly requested that WHO review current evidence and prepare a report describing how digital marketing strategies are being used for the promotion of breast-milk substitutes. This report examines in greater depth the scope, techniques and impact of digital marketing strategies for the promotion of breast-milk substitutes.

Communication and Sport

Michael L. Butterworth, 2021-07-19. Sport is a universal feature of global popular culture. It shapes our identities, affects our relationships and defines our communities. It also influences our consumption habits, represents our cultures and dramatizes our politics. In other words, sport is among the most prominent vehicles for communication available in daily life. Nevertheless, only recently has it begun to receive robust attention in the discipline of communication studies. The handbook of Communication and Sport attends to the recent and rapid growth of scholarship in communication and media studies that features sport as a central site of inquiry. The book attempts to capture a full range of methods, theories and topics that have come to define the subfield of communication and sport or sports communication. It does so by emphasizing four primary features. First, it foregrounds communication as central to the study of sport. This emphasis helps to distinguish the book from collections in related disciplines such as sociology and also points readers beyond media as the primary or only context for understanding the relationship between communication and sport. Thus, in addition to studies of media effects, mediatization, media framing and more, readers will also engage with studies in interpersonal, intercultural, organizational and rhetorical communication. Second, the handbook presents an array of methods, theories and topics in the effort to chart a comprehensive landscape of communication and sport scholarship. Thus, readers will benefit from empirical, interpretive and critical work and they will also see studies drawing on varied texts and sites of inquiry. Third, the handbook of Communication and Sport includes a broad range of scholars from around the world. It is therefore neither European nor North American in its primary focus. In addition, the book includes contributors from commonly under-represented regions in Asia, Africa and South America. Fourth, the handbook aims to account for both historical trajectories and contemporary areas of interest. In this way, it covers the

central topics debates and perspectives from the past and also suggests continued and emerging pathways for the future Collectively the handbook of Communication and Sport aspires to provide scholars and students in communication and media studies with the most comprehensive assessment of the field available
