Handbook on Life Cycle Assessment Jeroen B. Guinée, 2006-04-11 Environmental policy aims at the transition to sustainable production and consumption This is taking place in different ways and at different levels In cases where businesses are continuously active to improve the environmental performance of their products and activities the availability of knowledge on environmental impacts is indispensable The integrated assessment of all environmental impacts from cradle to grave is the basis for many decisions relating to achieving improved products and services The assessment tool most widely used for this is the environmental Life Cycle Assessment or LCA Before you is the new Handbook of LCA replacing the previous edition of 1992 New developments in LCA methodology from all over the world have been discussed and where possible included in this new Handbook Integration of all developments into a new consistent method has been the main aim for the new Handbook The thinking on environment and sustainability is however quickly evolving so that it is already clear now that this new LCA Handbook does not embrace the very latest developments Therefore further revisions will have to take place in the future A major advantage of this Handbook is that it now also advises which procedures should be followed to achieve adequate relevant and accepted results Furthermore the distinction between detailed and simplified LCA makes this Handbook more broadly applicable while guidance is provided as to which additional information can be relevant for specialised applications *Integrated Design and Simulation of Chemical Processes* Alexandre C. Dimian, 2003-05-13 This title aims to teach how to invent optimal and sustainable chemical processes by making use of systematic conceptual methods and computer simulation techniques The material covers five sections process simulation thermodynamic methods process synthesis process integration and design project including case studies It is primarily intended as a teaching support for undergraduate and postgraduate students following various process design courses and projects but will also be of great value to professional engineers interested in the newest design methods Provides an introduction to the newest design methods Of great value to undergraduate and postgraduate students as well as professional engineers Numerous examples illustrate theoretical principles and design issues 21st European Symposium on Computer Aided Process Engineering, 2011-06-10 The European Symposium on Computer Aided Process Engineering ESCAPE series presents the latest innovations and achievements of leading professionals from the industrial and academic communities The ESCAPE series serves as a forum for engineers scientists researchers managers and students to present and discuss progress being made in the area of computer aided process engineering CAPE European industries large and small are bringing innovations into our lives whether in the form of new technologies to address environmental problems new products to make our homes more comfortable and energy efficient or new therapies to improve the health and well being of European citizens Moreover the European Industry needs to undertake research and technological initiatives in response to humanity's Grand Challenges described in the declaration of Lund namely Global Warming Tightening Supplies of Energy Water and Food Ageing Societies
