Commitment The Dynamic Of Strategy:

Commitment Pankaj Ghemawat,1991 The author examines commitment the tendency of business strategies to persist over time and demonstrates with actual company examples how current decisions are constrained by past decisions and future decisions by current ones Topics covered include four business conditions facing managers who look to the future locked in when a company maintains a strategy as a result of massive investment locked out the cost of lost opportunities that can never be pursued again lags making it imperative to stick with a strategy until certain key results are achieved inertia the tendency of a company to preserve the status quo The text also attempts to explain why one company s performance differs from its competitors *Dynamic Strategy* Lalit Manral,2025-09-26 This book explains the dynamic processes of strategic management through scientific theorizing of the temporal heterogeneity of profit seeking firms strategic behavior The theoretical explanation of dynamic strategy provided herein which is not without significant normative implications captures the inherent paradox of dynamic strategy That a stream of dynamically inconsistent elemental actions of dynamic strategy which are inextricably linked to the fundamental drivers of enterprise value in dynamic competitive environments is requisite to achieve dynamically consistent returns over the firm s lifetime The implementation challenge for a firm seeking to achieve its intended objective lies in comprehending and managing the dynamic interplay among the processes outside and within the firm that co create the dynamic context of the continuously emerging stream of strategic actions which are elemental to dynamic strategy and their performance outcomes The book applies evolutionary theory to provide an alternative conceptualization of firms temporal modification of strategic behavior The explanatory framework is that of a quasi Darwinian evolution by economic selection as opposed to the Darwinian evolution by natural selection A quasi Darwinian evolutionary theory of dynamic strategy which situates the strategizing firm in an economic population of profit seeking firms conceptualizes dynamic strategy both as a determinant driver and an outcome product of hybrid as opposed to top down artificial or bottom up natural economic evolution Catering to scholars in strategic management with appeal to most management sub disciplines this work provides researchers with the conceptual wherewithal to both formally and empirically model a wide variety of phenomena in dynamic industrial settings **The Dynamics of Strategy** Duncan A.
