Power Shift Transmission Testing And Adjusting

Important Information

WARNING

When testing must be done in a closed area, activate the brakes and use blocks to prevent the machine from moving during the test. Let only approved personnel on the machine. Keep other personnel off the machine and in view of the operator.

NOTICE

Do not operate the machine with the universal joint removed. The force of hydraulic pressure on the output shaft will cause the shaft to move out of the torque divider. The result is a rapid loss of hydraulic oil.

NOTE: All tests and adjustments must be made with the oil in the hydraulic control system at normal operating temperature. Be sure the linkage adjustments are correct before making any tests.
