

Remember...

To achieve a fair shot, you as an animal that is running or moving should stay true to the line of sight. You should not be running or moving, and you should not be running or moving.

The most effective location for a turkey is in the forest and woods. The ground and the air are the best places to find a turkey, and the best place to find a turkey is in the forest and woods.

Vital Shots

Every hunter wants to bring home the game he or she is seeking, and sometimes the only way to do it is by inflicting a minimal amount of suffering. To achieve this, you must be sure that you understand the anatomy of the game you're shooting and know how to place a shot for a clean kill.

Where To Shoot

- The most effective shot on a deer is in the vital organs—the heart and lungs. In large game animals, these organs lie in the chest cavity behind the front shoulder. A long shot is the most effective shot for big game.
- The aim of the vital organs shot is to cause major blood vessel and arterial damage. A shot in this area causes considerable bleeding. If the animal drops the immediately will stop to die, it will have a blood vessel that's cut or torn.
- Aside from being a good technique, the key to a clean kill is patience. Hunters should wait until the vital organs are only if you do not have a clean shot in the vital organs, wait until the animal presents the best possible shot.

Choosing the Proper Shot Angle

The shot angle is the angle at which the animal is standing in relation to the hunter. Knowing which angles offer the most effective—and least effective—shots is an essential part of being a responsible hunter.

Broadside

The broadside shot angle is the preferred shot angle for both hunters and both hunters for large game animals, such as elk, deer, and bear.

- **Elk:** The broadside position offers several excellent shots for a hunter. The best target is the shoulder and chest area. A bullet of the correct weight that is fired from a distance allows for the game will break the shoulder bone and sever the lungs or heart.
- **Deer:** The broadside angle offers the best shot for the largest big game animals, such as elk, deer, and bear. The most big game, the shooting spot is straight up from the back side of the front leg, one-third of the way up from the bottom of the chest. The arrow will penetrate the rib but not the shoulder bone, and the arrow will be forward, and not behind the shoulder.
- **Quarrying Away:** The quarrying away shot angle is when your target is facing away from you but at an angle. The animal is usually looking away from you.
 - **Elk:** For hunters, the quarrying away position offers several shooting spots on all big game. The area just behind the shoulder is the best shooting spot for those practitioners of the vital organs. From on facing the chest area above the upper front leg.

Firing Positions

There are four standard rifle firing positions: prone, standing, sitting, and kneeling.

Prone

The prone position is the most stable of the four positions. Because it's the easiest to hold, it's the best position for maximizing the effectiveness of long-range, heavy-caliber, sniper rifles and bolt-action rifles.

Standing

With neither arm supported, this is the most difficult position for firing an accurate shot. Rather than trying to hold the barrel steady, which is impossible, try to keep movement of the barrel to a minimum as you aim at your target. A steady, natural motion will produce the best shot.

Sitting

Both arms are supported by your legs. More so the prone position, this is the most stable position.

Kneeling

With only one arm braced, the kneeling position is less steady than the prone and sitting positions.

Safety Tip

Shooting a firearm can cause explosion and permanent injury and even loss of life.

- When shooting any firearm, always wear properly fitting eye protection for target practice, use an earplug or earmuff or both, with a high Noise Reduction Rating (NRR).

When hunting, use the same eye and ear protection that you would use when shooting a target. Always use the same eye and ear protection when hunting. Use the same eye and ear protection when hunting. Use the same eye and ear protection when hunting.

- Use your visible eye protection, such as shooting glasses, only high-impact lenses when shooting to protect your vision.

California Hunters Safety Course Study Guide:

Guide to Hunting Deer in California John Higley, 2002 **California Code of Regulations** California. Fish and Game Commission, 1999 Safety Review , 1959 **Growing up in the Land of Tattooed Men** Joseph Herren, 2012-06-06
Growing up in the Land of Tattooed Men serves as an account of one young man's impressions, observations and judgments as he experiences both the immediate and the far-reaching effects of the Vietnam War. The author's goal is to use the story as a means of sharing a little of himself with his current and future grandchildren. The author, a retired geothermal power plant operator, began this project upon learning of his daughter's first pregnancy. **Outdoor California** , 2018 *West's California Codes* California, 1996 **Man Made** Joel Stein, 2012-05-15
The smudge looked suspiciously penis-like. The doctor confirmed that it was the baby's penis, which caused not celebration but panic. Joel pictured having to go camping and fix a car and use a hammer and throw a football and watch professionals throw footballs and figure out whether to be sad or happy about the results of said football throwing. So begins his quest to confront his effete nature, whether he likes it or not. He doesn't by doing a twenty-four hour shift with L.A. firefighters, going hunting, rebuilding a house, driving a Lamborghini, enduring three days of boot camp with the U.S. Army, day trading with 100,000 and going into the ring with UFC Hall of Famer Randy Couture. Seeking help from a panel of experts including his manly father-in-law, Boy Scouts, former NFL star Warren Sapp, former MLB All-Star Shawn Green, Adam Carolla, and a pit bull named Hercules, he expects to learn that masculinity is defined not by the size of his muscles but by the size of his heart, also technically a muscle. This is not at all what he learns. Report California. Department of Fish and Game, 1956
