The book also has an extensive introduction to programming using the Java language, making this book appropriate for Java courses that want to add an app programming flavor **Android 6 for Programmers** Paul Deitel, Harvey Deitel, Alexander Wald, 2015-11-20 The professional programmer's Deitel guide to smartphone and tablet app development using Android M and the new Android Studio IDE. Billions of apps have been downloaded from Google Play tm. This book gives you everything you'll need to start developing great Android M apps quickly and getting them published on Google Play tm. The book uses an app driven approach: each new technology is discussed in the context of seven fully tested Android apps, complete with code highlighting, code walkthroughs and sample outputs. Apps you'll develop include: Welcome App, Cannon Game, Tip Calculator, Doodlz, Twitter Searches, Flag Quiz, Address Book. This book presents leading edge computing technologies for professional software developers. At the heart of the book is the Deitel app driven approach: concepts are presented in the context of complete working Android apps, rather than using code snippets. The introduction and app test drives at the beginning of each chapter show one or more sample executions. The apps in this book were carefully designed to introduce you to key Android features and APIs. You'll quickly learn everything you need to start building Android apps, beginning with a testdrive of the Doodlz app in Chapter 1, then building your first app in Chapter 2. By

the time you reach Chapter 9 you'll be ready to create your own apps for submission to Google Play and other app marketplaces. You'll master the Google Play submission process including uploading your apps, deciding whether to sell your apps or offer them for free and marketing them using in-app advertising, social media, Internet, public relations and more. The Deitel Developer Series is designed for professional programmers. The series presents focused treatments on a growing list of emerging and mature technologies including Android™ app development, iOS app development, Java™, C and .NET C/C++, Java, JavaScript, Internet and web development and more. Each book in the series contains the same live code teaching methodology used in the Deitels How to Program Series college textbooks; most concepts are presented in the context of completely coded working apps. Deitel Associates is an internationally recognized authoring and corporate training organization specializing in Android™ and iOS app development, programming languages, object technology and Internet and web software technology. The company offers instructor-led courses delivered at client sites worldwide on programming languages and platforms such as Android™ app development, iOS app development, Java™, Objective-C, C/C++, Visual Basic, Visual C/C++, XML, Python, Perl, object technology, Internet and web programming and a growing list of additional programming and software development courses. [Swift for Programmers](#) Paul J. Deitel, Harvey M. Deitel, 2015. Swift for Programmers is a programming language focused book designed to get practicing programmers up to speed quickly in Swift programming. The Deitels provide thousands of lines of proven Swift code in the book using a mix of code snippets and live code examples. When they present code snippets rather than full-length complete programs, the snippet will be extracted from a Deitel-created compiled live code example to ensure that the snippet is correct. [Android How to Program, Second Edition](#) Paul Deitel, Harvey Deitel, Abbey Deitel, 2014. Android How to Program Second Edition provides a clear and entertaining app-driven introduction to Android 4.3 and 4.4 development for both introductory and intermediate level programming courses. It also serves as a great reference and tutorial to learn Android programming. The Deitels' app-driven approach is simply the best way to master Android programming. The Deitels teach Android programming through seven complete working Android Apps in the print book and more online. Each chapter presents new concepts through a single App. The authors first provide an introduction to the app, an app test drive showing one or more sample executions and a technologies overview. Next the authors proceed with a detailed code walkthrough of

the app's source code in which they discuss the programming concepts and demonstrate the functionality of the Android APIs used in the app. The book also has an extensive introduction to programming using the Java language making this book appropriate for Java courses that want to add an App programming flavor. Teaching and Learning Experience: This program will provide a better teaching and learning experience for you and your students. Add an App Component to your Java Course. The appendices provide a condensed friendly introduction to Java and the object oriented programming techniques students will need to develop Android apps. Motivate Students with an App driven Approach to Android 4.3 and 4.4 Development. Concepts are presented in the context of 7 complete working Android Apps using the latest mobile computing technologies. Enhance Learning with Outstanding Pedagogical Features: The Deitels present hundreds of Android short answer questions and app development exercises complete with syntax coloring, code walkthroughs and sample outputs.

[Android App Developer](#) Paul Deitel, 2016 Overview: This Learning Path includes Java Fundamentals LiveLessons Part 1 and Android 6 App Development LiveLessons Part 1 and 2. Download the lesson files at http://www.deitel.com/bookresources/androidfp3_androidfp3_examples.zip. Prerequisites: Familiarity with the basics of software development projects. Description: This online course is the professional programmer's guide to Java SE 7 and SE 8 development. With 8 hours of instruction, Java Fundamentals Part I applies the Deitel signature live code approach to teaching and explores the language and APIs in depth. Concepts are presented in the context of fully tested programs. The course features hundreds of complete programs with thousands of lines of proven Java™ code along with hundreds of tips that will help you build robust applications. Paul Deitel, best selling author and Oracle Java™ Champion, carefully introduces you to Android app development with key Android 6.0 features and APIs. You'll first learn how to install and configure Google's Android Studio IDE. Using the Deitel's signature App Driven Approach in which all concepts are presented in the context of complete working apps, you'll then build seven Android apps that introduce everything you need to start creating your own: Welcome app, Tip Calculator app, Flag Quiz app, Doodlz drawing app, Cannon Game app, WeatherViewer app, Twitter Searches app and Address Book app. Along the way you'll learn to master the Android APIs and FrameWorks needed to become a successful Android app developer. About the Instructor: Paul Deitel is the co-founder of Deitel Associates Inc, the internationally recognized programming languages authoring corporate training and Internet business development organization. Paul and his father, Harvey Deitel, have written many international best selling programming language professional books and textbooks that millions of people worldwide have used to master C, C++, Java™, C, Visual Basic, Visual C, XML, Perl, Python and Internet and web programming.
