Quick Start Post Apocalyptic Story:

Postapocalyptic Fiction and the Social Contract Claire P. Curtis, 2010-07-17 Postapocalyptic Fiction and the Social Contract We'll Not Go Home Again provides a framework for our fascination with the apocalyptic events. The popular appeal of the end of the world genre is clear in movies, novels, and television shows. Even our political debates over global warming, nuclear threats, and pandemic disease reflect a concern about the possibility of such events. This popular fascination is really a fascination with survival: how can we come out alive? And what would we do next? The end of the world is not about species death but about beginning again. This book uses postapocalyptic fiction as a terrain for thinking about the state of nature, the hypothetical fiction that is the driving force behind the social contract. The first half of the book examines novels that tell the story of the move from the state of nature to civil society through a Hobbesian, a Lockean, or a Rousseauian lens, including Lucifer's Hammer by Larry Niven and Jerry Pournelle, Alas, Babylon by Pat Frank, Malevil by Robert Merle, and Into the Forest by Jean Hegland. The latter half of the book examines Octavia Butler's postapocalyptic Parable series in which a new kind of social contract emerges, one built on the fact of human dependence and vulnerability.

Teeth and Talons (Volume I)

Jason Youngdale, 2019-12-09 **Teeth and Talons** Volume I describes different creatures for your players' characters to run into during a RPG adventure. This book also contains Quick Start rules for Sage Sand at the back. Statistics are provided for three other RPG systems besides Sage Sand. Though conversion of the stats to the Astral Conflict RPG or other RPGs is easy. These creatures shown in this book are bizarre and unique. The artwork was done by a variety of artists. I am excited to work further with them. I hope you enjoy scaring your players with these monsters.

[Avatars of the Amazon](#) Jason Youngdale, 2019-10-09
The Amazon Rain Forest burns and is being cut down at an alarming rate. Kapatilist Corporation is sick of the locals disrupting its greedy pursuits. Forest fires from both sides have been started and the ecosystem is in danger. A giant weaponized vehicle of destruction has been created by the Kapatilist Corporation to deal with tree cutting and meddlesome local eco-warriors. The Forest itself cries out. An old woman with an interesting necklace begs for your help. The machine must be destroyed. This is an introductory adventure for the Sage Sand Role playing game. You don't need the base rulebook to play as Quick Start rules are provided. But it is recommended. The adventure is based in the Amazon Rainforest. Five players is the ideal number for this adventure.

[Perceiving Environments. Protagonist Perspectives in Post-Apocalyptic Novels](#) Ilayda Can, 2023-08-31 Bachelor Thesis from the year 2020 in the subject American Studies Literature grade 1.5 University of Flensburg Institut für Sprache, Literatur und Medien course American Literature language English abstract: The allure of dystopian novels lies in how they scrutinize the relationships between humans and the environment in a post-apocalyptic world. This introduction discusses mankind's fascination with the end of the world and how authors utilize the opportunity to create innovative ideas on a tabula rasa to shape the social fabric and environment of a post-apocalyptic world. The analysis begins with the origins of the apocalypse concept in eschatological narratives, compares Biblical and Qur'anic depictions and

investigates how contemporary authors utilize and adapt these elements to address current and forthcoming environmental issues in their works **The Knowledge** Lewis Dartnell,2014-04-17 How would you go about rebuilding a technological society from scratch If our technological society collapsed tomorrow what would be the one book you would want to press into the hands of the postapocalyptic survivors What crucial knowledge would they need to survive in the immediate aftermath and to rebuild civilization as quickly as possible Human knowledge is collective distributed across the population It has built on itself for centuries becoming vast and increasingly specialized Most of us are ignorant about the fundamental principles of the civilization that supports us happily utilizing the latest or even the most basic technology without having the slightest idea of why it works or how it came to be If you had to go back to absolute basics like some sort of postcataclysmic Robinson Crusoe would you know how to re create an internal combustion engine put together a microscope get metals out of rock or even how to produce food for yourself Lewis Dartnell proposes that the key to preserving civilization in an apocalyptic scenario is to provide a quickstart guide adapted to cataclysmic circumstances The Knowledge describes many of the modern technologies we employ but first it explains the fundamentals upon which they are built Every piece of technology rests on an enormous support network of other technologies all interlinked and mutually dependent You can't hope to build a radio for example without understanding how to acquire the raw materials it requires as well as generate the electricity needed to run it But Dartnell doesn't just provide specific information for starting over he also reveals the greatest invention of them all the phenomenal knowledge generating machine that is the scientific method itself The Knowledge is a brilliantly original guide to the fundamentals of science and how it built our modern world
