This book is a toolkit for youth and young adult librarians, school and public who wish to incorporate science, technology, engineering, art, and math (STEAM) into their programs and collections but aren't sure where to begin. Most educators are well aware of the reasons for emphasizing STEAM topics that fall within the broad headings of science, technology, engineering, arts, and mathematics in the curriculum regardless of grade level. But how do librarians who work with tweens in middle school, high school, and public libraries fit into the picture and play their roles to underscore their relevance in making STEAM initiatives successful? This book answers those key questions, providing program guidelines and resources for each of the STEAM areas. Readers will learn how to collaborate in STEAM efforts by providing information on resources, activities, standards, conferences, museums, programs, and professional organizations. Emphasis is placed on encouraging girls and minorities to take part in and get excited about STEAM. In addition, the book examines how makerspaces can enhance this initiative, how to connect your programs to educational standards, where to find funding, how to effectively promote your resources and programs, including how school and public librarians can collaborate to maximize their efforts, how to find and provide professional development, and how to evaluate your program to make further improvements and boost effectiveness. Whether you are on the cusp of launching a STEAM initiative or looking for ways to grow and enhance your program, this book will be an invaluable resource. **Word**

Study for Literacy Leaders Anne C. Ittner, Amy Frederick, Darl Kiernan, Donald R. Bear, 2023-08-22. Word study is an approach to teaching phonics, vocabulary, and spelling that is based on a developmental model described by Henderson and his students. Given the reciprocal nature between reading and writing, phonics, spelling, and vocabulary are integrated in instruction. Teachers understand that this word study approach integrates phonics, spelling, and vocabulary and have challenged us to share concrete examples of how teachers organize and implement word study and how literacy educators in universities and school districts conduct professional learning for word study. The primary goal then is to make word study work for our students. The authors of each chapter show how literacy leaders and teacher educators guide others in a wide variety of educational settings. Stories in this volume capture classroom conversations, describe professional learning communities, and present coaching scenarios that will resonate with readers' experiences. **STEM Learning with Young Children** Shelly Counsell, Lawrence Escalada, Rosemary Geiken, Melissa Sander, Jill Uhlenberg, Beth Van Meeteren, Sonia Yoshizawa, Betty Zan, 2016.
