techniques and gain confidence acknowledging not only the patient's fear of injection but also the fears of the inexperienced clinician. An outstanding art program features more than 500 full color photographs and illustrations. Technique and Procedures boxes provide illustrated step by step instructions for performing specific procedures including indications, contraindications, nerves and teeth affected, operator and patient positioning, insertion point, penetration amount of anesthetic, and working time. Color coded anesthesia boxes match the color scheme developed and used by the ADA American Dental Association and help in choosing the best agent for the type of anesthesia required, providing images, selection tips, precautions, and maximum dosing information. Review questions at the end of each chapter provide the opportunity to assess your understanding, and the Evolve companion website provides a 55 question mock examination and chapter practice quizzes. Case studies make it easier to apply concepts to the clinical setting and to develop problem solving skills. Dental Hygiene Considerations boxes summarize key points and tips for optimal care. Key terms are highlighted within the text and defined in the glossary. Learning objectives begin each chapter and set goals for what you will accomplish; they also help you study for examinations. A focus on the Human Needs Theory relates the administration of local anesthesia and dental hygiene care to the eight human needs. Summary tables and boxes help you review and study concepts, procedures, and techniques. Expert author Demetra Logothetis is a dental hygiene educator with 20 years of experience teaching local anesthesia and pain control. End of chapter resources include lists of current evidence based literature for further research or study. NEW Local Anesthesia for the Child and Adolescent chapter focuses on the delivery techniques and administration protocol needed for pediatric and adolescent patients. NEW Advanced local anesthetic techniques include the Vazirani Akinosi mandibular block, intraseptal injections, and pre puncture technique for the C-CLAD. NEW Coverage of dynamic and emerging topics include newer anesthetic agents, buffering of anesthetics, determination of drug dosages, armamentarium, and syringe preparation, maxillary and mandibular injection techniques, and fulcrums, and information on electronic devices and new equipment. NEW clinical photos show basic and advanced injection techniques for maxillary and mandibular anesthesia, and new illustrations depict dental anatomy.
