Cad And Pdm Optimizing Processes By Integrating Them:

CAD and PDM Ulrich Sendler, Volker Wawer, 2008 **Product Lifecycle Management for a Global Market** Shuichi Fukuda, Alain Bernard, Balan Gurumoorthy, Abdelaziz Bouras, 2014-12-17 This book constitutes the refereed post proceedings of the 11th IFIP WG 5.1 International Conference on Product Lifecycle Management PLM 2014 held in Yokohama Japan in July 2014. The 51 full papers presented were carefully reviewed and selected from 77 submissions. They are organized in the following topical sections: BIM operations; maintenance and renovation; BIM concepts and lifecycle management; design and education; naval engineering and shipbuilding; aeronautical and automotive engineering; industry and consumer products; interoperability; integration; configuration systems; engineering change management and maturity; knowledge engineering; knowledge management; service and manufacturing; and new PLM. *Glocalized Solutions for Sustainability in Manufacturing* Jürgen Hesselbach, Christoph Herrmann, 2011-03-19 The 18th CIRP International Conference on Life Cycle Engineering LCE 2011 continues a long tradition of scientific meetings focusing on the exchange of industrial and academic knowledge and experiences in life cycle assessment, product development, sustainable manufacturing, and end of life management. The theme *Glocalized Solutions for Sustainability in Manufacturing* addresses the need for engineers to develop solutions which have the potential to address global challenges by providing products, services, and processes taking into account local capabilities and constraints to achieve an economically, socially, and environmentally sustainable society in a global perspective. *Glocalized Solutions for Sustainability in Manufacturing* do not only involve products or services that are changed for a local market by simple substitution or the omitting of functions. Products and services need to be addressed that ensure a high standard of living everywhere. Resources required for manufacturing and use of such products are limited and not evenly distributed in the world. Locally available resources, local capabilities, as well as local constraints have to be drivers for product and process innovations with respect to the entire life cycle. The 18th CIRP International Conference on Life Cycle Engineering LCE 2011 serves as a platform for the discussion of the resulting challenges and the collaborative development of new scientific ideas. Integrated Computer-Aided Design in Automotive Development Hirz Mario, Wilhelm Dietrich, Anton Gfrerrer, Johann Lang, 2013-06-22 The automotive industry faces constant pressure to reduce development costs and time while still increasing vehicle quality. To meet this challenge, engineers and researchers in both science and industry are developing effective strategies and flexible tools by enhancing and further integrating powerful computer-aided design technology. This book provides a valuable overview of the development tools and methods of today and tomorrow. It is targeted not only towards professional project and design engineers but also to students and to anyone who is interested in state of the art computer-aided development. The book begins with an overview of automotive development processes and the principles of virtual product development. Focusing on computer-aided design, a comprehensive outline of the fundamentals of geometry representation provides a deeper insight into the mathematical techniques used to describe and model geometrical

elements The book then explores the link between the demands of integrated design processes and efficient data management Within automotive development the management of knowledge and engineering data plays a crucial role Some selected representative applications provide insight into the complex interactions between computer aided design knowledge based engineering and data management and highlight some of the important methods currently emerging in the field
