

Defcon is an entry level competitive wargame. Each player controls one of the Megapowers. The goal of the game is to gain most consensus by the end of the fifth round: consensus is composed by the sum of the military index (territories controlled) and the reputation index. Each round is divided in five phases. Every phase is completed by all players following the initiative order before advancing to the next one. Players who find the right balance between military strength and the public's opinion will win the game.

## **Defcon Strategy:**

US Military Strategy and the Cold War Endgame Stephen J. Cimbala, 1995 The transition from the end of the Cold War to a new world order is both promising and perilous The US and its NATO allies were caught largely unprepared by the rapid collapse of the Warsaw Pact the sudden demise of the Soviet Union and the reunification of Germany events that redrew the map of East Central Europe and shifted US security concerns eastward in Eurasia They also redefined security as a condition based more on the prevention or containment of regional and civic conflicts compared with the Cold War expectations of global or nuclear war The next century is certain to strain US and NATO strategy considerably if indeed NATO survives at all A new group of interstate institutions for European security will compete for the right to claim pre eminence in security issues International peace keeping and peace enforcement whether United Nations directed or regionally sponsored will also challenge traditional definitions or military missions Changes will also occur in the role of nuclear weapons in military strategy US and Russian strategic nuclear forces will be drastically reduced and both states will take other steps to dampen the nuclear arms race The antagonists of the Cold War will be the collaborators of the next century in seeking to stabilize conflicts inside and outside Europe *Western Europe In Kissinger's Global Strategy* Argyris G Andrianopoulos, 1988-08-31

*Mac Life* ,2007-09 *The Strategic Nuclear Balance* Peter Vincent Pry, 1990 Examines the strategic nuclear balance using exchange models a form of dynamic analysis that simulates possible nuclear wars between the United States and the Soviet Union **Nuclear Shadowboxing: Contemporary Threats from Cold War Weaponry; Volume 1: Cold War Redux** Alexander DeVolpi, Vladimir E. Minkov, Vadim A. Simonenko, George S. Stanford, 2004 **Strategy After Deterrence** Stephen J. Cimbala, 1991-01-30 The profound political changes in the USSR and Eastern Europe during 1989 have forced the United States and its Western European allies to reevaluate both their long held military strategy of nuclear deterrence and the traditional role of NATO in European affairs In this volume Stephen Cimbala considers the ways in which American military priorities will have to change now that the tangible threat to Europe has been removed exploring the options available to America and NATO given the new political and economic realities in Europe and the Soviet Union Drawing upon a rich literature of Soviet and American defense strategy Cimbala examines the structure and effectiveness of deterrence as a military strategy the relationship between conventional and nuclear weapons the likely course of future conflicts and alternative military strategies Following an introductory chapter which defines the concepts of deterrence and dissuasion and offers an overview of the changing character of European politics Cimbala reviews the political context for the development of military strategy in Europe Subsequent chapters consider the relationship between military stability and the likelihood of winning wars in their initial stages analyze the issue of deterrence during war discuss the potential for atypical wars in the future and investigate the linkages between deception and deterrence A separate chapter addresses the attempt to substitute non nuclear dissuasion for nuclear deterrence in the form of anti nuclear strategic defenses which could defeat

nuclear offenses In the final chapter Cimbala summarizes his conclusions and makes some additional observations about the implications of our new view of NATO and deterrence Students of international relations foreign policy and military studies will find Cimbala s work enlightening and provocative reading

**Deterring International Terrorism and Rogue States** James H. Lebovic, 2007 This new study challenges the widely held view that many current US adversaries cannot be deterred maintaining that deterrence is not a relic of the Cold War period and that it should shape US policies toward so called rogue states and terror groups James Lebovic argues that deterrence principles continue to apply and focuses upon the three pillars of the Bush administration's national security policy missile defence which preoccupied the administration until September 11 2001 pre-emption which became the US focus with the September 11 attacks and US success in overthrowing the Taliban regime in Afghanistan homeland security which the administration has portrayed as

more a natural response to threat than an aspect of policy that must be reconciled with the other pillars Deterring International Terrorism and Rogue States asserts that bad offences and defences have been endemic to the current US policy approach leading US policy makers to pursue policies that require them to do everything without adequate concern for resource trade offs overreach and unintended consequences This book will be of great interest to students of US foreign policy national and international security terrorism and international relations in general
