IBM System Storage SAN Volume Controller SVC is a virtualization appliance solution that maps virtualized volumes visible to hosts and applications to physical volumes on storage devices. With IBM System Storage Productivity Center SSPC™ administrators can manage storage along with the other devices in the storage environment. This greatly simplifies management of even the most basic storage environments, and the awareness of environment helps to reduce accidental errors that can cause downtime. SSPC comes preloaded with IBM Tivoli Storage Productivity Center products, enables end-to-end disk management on a single screen, and supports management of heterogeneous systems and devices.
