searches cannot be performed efficiently. The meeting also deals with problems in computational biology, data compression and data mining, coding, information retrieval, natural language processing and pattern recognition. **Combinatorial Pattern Matching** Paolo Ferragina, Gad M. Landau, 2008-06-08. The papers contained in this volume were presented at the 19th Annual Symposium on Combinatorial Pattern Matching (CPM 2008) held at the University of Pisa, Italy, June 18–20, 2008. All the papers presented at the conference are original research contributions on computational pattern matching and analysis. They were selected from 78 submissions. Each submission was reviewed by at least three reviewers. The committee decided to accept 25 papers. The programme also includes three invited talks by Daniel M. Gusseld from the University of California Davis, USA; J. Ian Munro from the University of Waterloo, Canada; and Prabhakar Raghavan from Yahoo! Research, USA. The objective of the annual CPM meetings is to provide an international forum for research in combinatorial pattern matching and related applications. It addresses issues of searching and matching strings and more complicated patterns such as trees, regular expressions, graphs, point sets and arrays. The goal is to derive non-trivial combinatorial properties of such structures and to exploit these properties in order to either achieve superior performance for the corresponding computational problems or pinpoint conditions under which searches cannot be performed efficiently. The meeting also deals with problems in computational biology, data compression, data mining, coding, information retrieval, natural language processing and pattern recognition.

**Combinatorial Pattern Matching** Alberto Apostolico, Maxime Crochemore, Kunsoo Park, 2005-05-13. This book constitutes the refereed proceedings of the 16th Annual Symposium on Combinatorial Pattern Matching (CPM 2005) held in Jeju Island, Korea, on June 19–22, 2005. The 37 revised full papers presented were carefully reviewed and selected from 129 submissions. They constitute original research contributions in combinatorial pattern matching and its applications. Among the application fields addressed are computational biology, bioinformatics, genomics, proteomics, data compression, Sequence Analysis and Graphs, information retrieval, data analysis and pattern recognition. **Combinatorial Pattern Matching** Alberto Apostolico, Masayuki Takeda, 2003-08-02. The papers contained in this volume were presented at the 13th Annual Symposium on Combinatorial Pattern Matching held July 3–5, 2002 at the Hotel Uminonakamichi in Fukuoka, Japan. They were selected from 37 abstracts submitted in response to the call for papers. In addition there were invited lectures by Shinichi Morishita (University of Tokyo) and Hiroki Arimura (Kyushu University). Combinatorial Pattern Matching (CPM) addresses issues of searching and matching strings and more complicated patterns such as trees, regular expressions, graphs, point sets and arrays in various formats. The goal is to derive non-trivial combinatorial properties of such structures and to exploit these properties in order to achieve superior performance for the corresponding computational problems. On the other hand an important goal is to analyze and pinpoint the properties and conditions under which searches cannot be performed efficiently. Over the past decade a steady flow of high quality research on this subject has changed a sparse set of isolated results into a full-fledged area of algorithmics. This area is continuing to grow even further due to the increasing demand for speed and efficiency that stems

from important applications such as the World Wide Web computational biology computer vision and multimedia systems These involve requirements for information retrieval in heterogeneous databases data compression and pattern recognition The objective of the annual CPM gathering is to provide an international forum for research in combinatorial pattern matching and related applications
