*Teaching the Literature of Climate Change* Debra J. Rosenthal, 2024-04-26 Over the past several decades writers such as Margaret Atwood Paolo Bacigalupi Octavia E Butler and Kathy Acker have explored climate change through literature reflecting current anxieties about humans impact on the planet Emphasizing the importance of interdisciplinarity this volume embraces literature as a means to cultivate students understanding of the ongoing climate crisis ethics in times of disaster and the intrinsic intersectionality of environmental issues Contributors discuss speculative climate futures the Anthropocene postcolonialism climate anxiety and the usefulness of storytelling in engaging with catastrophe The essays offer approaches to teaching interdisciplinary and cross listed courses including strategies for team teaching across disciplines and for building connections between humanities majors and STEM majors The volume concludes with essays that explore ways to address grief and to contemplate a hopeful future in the face of apocalyptic predictions

**Visions of the Wasteland in "Maze Runner". The Scorch Trials as Climate Fiction** Sara Bauer, 2023-12-08 Seminar paper from the year 2023 in the subject English Language and Literature Studies Literature grade 1.0 Humboldt University of Berlin Anglistik Amerikanistik course Genre Fiction language English abstract This seminar paper will deep dive into the origins of climate fiction and the imagery used in the novel as well as compare it to current realities to unveil how The Scorch Trials serves as an allegory of the pressing issues of climate change and a possible future we might face and why it can be categorized as cli fi Is climate fiction merely a subgenre of science fiction or could we already classify it as a genre of its own How do we understand the cultural context of such narratives and what realities do climate fiction draw from A link to James Dashner's novel Maze Runner The Scorch Trials is to be made by looking into dystopian narratives and current pressing climate issues portrayed in The Maze Runner Scorch Trials through climate fiction narration

**Ecological Exile** Derek Gladwin, 2017-11-13 Ecological Exile explores how contemporary literature film and media culture confront ecological crises through perspectives of spatial justice a facet of social justice that looks at unjust circumstances as a phenomenon of space Growing instances of flooding population displacement and pollution suggest an urgent need to re-examine the ways social and geographical spaces are perceived and valued in the twentieth and twenty-first centuries Maintaining that ecological crises are largely socially produced Derek Gladwin considers how British and Irish literary and visual texts by Ian McEwan Sarah Gavron Eavan Boland John McGrath and China Miéville among others respond to and confront various spatial injustices resulting from fossil fuel production and the effects of climate change This ambitious book offers a new spatial perspective in the environmental humanities by focusing on what the philosopher Glenn Albrecht has termed solastalgia a feeling of homesickness caused by environmental damage The result of solastalgia is that people feel paradoxically ecologically exiled in the places they continue to live because of destructive environmental changes Gladwin skilfully traces spatially produced instances of ecological injustice that literally and imaginatively abolish people's sense of place or place home By looking at two of the

most pressing social and environmental concerns oil and climate Ecological Exile shows how literary and visual texts have documented spatially unjust effects of solastalgia This interdisciplinary book will appeal to students scholars and professionals studying literary film and media texts that draw on environment and sustainability cultural geography energy cultures climate change and social justice *Ecology & Environment Quick Revision Material for UPSC & State PSC General Studies Exams* Disha Experts,2021-08-01 *The Sage Handbook of Promotional Culture and Society* Lee Edwards,Clea Bourne,Jason Vincent A. Priestley**,2000 Fictionalizing Terra Rachel Be-Yun Wang,2020 This thesis uses the narrative genre of climate fiction as a mode of critique in the 2019 blockbuster science fiction film *Wandering Earth* to consider how it deals with eco optimism I started considering the speculative aspect of climate fiction a subgenre of science fiction as a discursive site when I encountered an institutional subset of the art world that engages with environmental activism and design that relies on real world specificities yet materially overlook their relation to systems around them When *Wandering Earth* was released in theatres popular discussion around the film curiously revealed similar attitudes *Wandering Earth* doesn't take the stance of standard cli fi narratives the responsibility for the earth is due to sun induced climate change not human induced climate change The film operates in a similar way to how some of these artists and designers think I use climate fiction's formal ambiguity and flexibility as critical framework for what doesn't neatly belong under climate fiction but perhaps relies on it By colliding climate fiction with fictionalized climates I hope to demonstrate the possibilities of differentiated interpretation using climate fiction as a genre of critique *Modern Jewish Studies Annual*,1997 **ACM SIGPLAN notices**,1991 Yiddish,1995 **EIB-information**,2014-03 **Proceedings of the National Academy of Sciences of the United States of America** National Academy of Sciences (U.S.),2007 **OOPSLA 2002**,2002 **Our Shared Storm** Andrew Dana Hudson,2022-04-05 Through speculative fiction five interlocking novelettes explore the possible realities of our climate future What is the future of our climate Given that our summers now regularly feature Arctic heat waves and wildfire blood

skies polar vortex winters that reach all the way down to Texas and 100 year storms that hit every few months it may seem that catastrophe is a done deal As grim as things are however we still have options Combining fiction and nonfiction and employing speculative tools for scholarly purposes Our Shared Storm explores not just one potential climate future but five possible outcomes dependent upon our actions today Written by speculative fiction writer and sustainability researcher Andrew Dana Hudson Our Shared Storm features five overlapping fictions to employ a futurist technique called scenarios thinking Rather than try to predict how history will unfold picking one out of many unpredictable and contingent branching paths it instead creates a set of futures that represent major trends or counterposed possibilities based on a set of climate modeling scenarios known as the Shared Socioeconomic Pathways SSPs The setting is the year 2054 during the Conference of the Parties global climate negotiations at the COP in Buenos Aires Argentina Each story features a common cast of characters but with events unfolding differently for them and human society in each alternate universe These five scenarios highlight the political economic and cultural possibilities of futures where investments in climate adaptation and mitigation promised today have been successfully completed kicked down the road or abandoned altogether From harrowing to hopeful these stories highlight the choices we must make to stabilize the planet Our Shared Storm is an experiment in deploying practice based research methods to explore the opportunities and challenges of using climate fiction to engage scientific and academic frameworks **Journal of the American Musicological Society** American Musicological Society,1957
