Net Neutrality and the Battle for the Open Internet Danny Kimball, 2022-08-24 Net neutrality a dry but crucial standard of openness in network access began as a technical principle informing obscure policy debates but became the flashpoint for an all out political battle for the future of communications and culture Net Neutrality and the Battle for the Open Internet is a critical cultural history of net neutrality that reveals how this intentionally boring world of internet infrastructure and regulation hides a fascinating and pivotal sphere of power with lessons for communication and media scholars activists and anyone interested in technology and politics While previous studies and academic discussions of net neutrality have been dominated by legal economic and technical perspectives Net Neutrality and the Battle for the Open Internet offers a humanities based critical theoretical approach telling the story of how activists and millions of everyday people online and in the streets were able to challenge the power of the phone and cable corporations that historically dominated communications policy making to advance equality and justice in media and technology **Wi-Fi/WLAN Monthly Newsletter November 2010 , Challenges and Opportunities in the 5 GHz Spectrum Band** United States. Subcommittee on Regulatory Reform, Commercial and Antitrust Law, 2014 **Choosing an Internet Shaped by Freedom**

Joshua J. Schroeder, 2014 The friction between copyright protection and internet freedom has hit a political boiling point In the Spring of 2012 public outcry shut down SOPA PIPA and ACTA and prompted the unveiling of the Electronic Communication Privacy Act and the Global Free Internet Act in the House of Representatives Furthermore FCC net neutrality rules have been challenged in federal court by Verizon and MetroPCS Until Congress can decide the future of the internet courts are faced with making sense of an increasingly dysfunctional body of law regarding online service providers OSPs The freewheeling fast evolving nature of the internet has facilitated significant contradictions between copyright gate keeping initiatives and the FCC s net neutrality rules This article argues that in order to avoid dysfunctional and contradictory applications of the law courts should avoid interpretations of copyright law that undermine the FCC s net neutrality rules Additionally this article will explain why the Second Circuit s recent interpretation of the DMCA knowledge requirement on a 12 b 6 motion should be reversed In 2011 the FCC s net neutrality rules were finally printed in the federal register Originally adopted in 2005 on a trial basis their purpose has been to preserve internet freedom and openness and avoid most internet gate keeping by service providers The net neutrality rules require transparency no blocking and no unreasonable discrimination against websites including BitTorrent and content including content of which there is no direct evidence the copyright holder approves of dissemination Meanwhile copyright cases have turned file sharing services into a pariah and have chided OSPs like YouTube for keeping a high number of copyrighted works on their networks without direct proof of copyright owner authorization As many OSP platforms are being shaped to avoid copyright liability FCC rules made to ensure net neutrality are needlessly being undermined In response the Supreme Court should broadly apply three rationales to ease the friction between telecommunications and copyright law 1 The Ninth Circuit s statutory interpretation of the DMCA safe harbor in *Shelton Capital* that requires specific knowledge 2 Judge Kozinski s dissent in *Perfect 10 v Visa* which focuses vicarious liability on the unjust enrichment of parties facilitating copyright infringement instead of the dissemination of copyrighted works by itself and 3 requiring plaintiffs to thoroughly prove direct infringement i e applying an analysis of fair use and the idea expression dichotomy before allowing evidence in to prove willful blindness volition knowledge or an intent to encourage infringement The FCC most heavily regulates internet service providers ISPs and copyright law puts the brunt of secondary liability on OSPs creating the appearance that the FCC is nearer to the core and copyright law nearer to the edge of internet regulation However because communications and copyrighted content are often one in the same in an online context preparations must be made to avoid an impending clash between the two The purpose of FCC net neutrality regulation is to protect both end users and OSPs from anticompetitive behavior that slows down innovation yet copyright law is becoming a back door to circumvent these protections This circumvention is made possible by acquisitions and exclusive transfers of IP rights with OSPs ISPs and content owners being affiliated or under common ownership For example the ISP Comcast owns as subsidiaries both NBC and Xfinity It is therefore in Comcast s interest to

use NBC's copyright portfolio to shape the online playing field in Xfinity's favor. Another example is Google YouTube's deal with Comcast NBC for being the exclusive online provider for the 2012 summer Olympics. Because of their agreement, an online viewer had to purchase an unrelated cable subscription in order to watch the Olympics online. In this scenario, Comcast was able to hire YouTube as a mercenary through copyright licensing to carry out anticompetitive behavior that would have attracted FCC antitrust scrutiny had they simply required the purchase of an unrelated cable subscription themselves. In this way, copyright law may be used as a back door for ISPs to circumvent FCC regulation if they create purchase or enter into exclusive contracts with an OSP. Copyright law is being shaped into a leveraging mechanism to justify anticompetitive behavior and circumvent FCC regulation that would otherwise stop the internet from being molded by the interests of massive corporations and used against the public interest.
