and the batteries and covers the relevant scientific and technological features Presenting large batteries for stationary

applications e g energy storage and also batteries for hybrid vehicles or different tools The important aerospace field is

covered both in connection with satellites and space missions Examples of applications include telecommunications

uninterruptible power supplies systems for safety alarms car accessories toll collection asset tracking systems medical

equipment and oil drilling The first chapter on applications deals with electric and hybrid vehicles Four chapters are devoted

to stationary applications i e energy storage from the electric grid or solar wind energy load levelling telecommunications

uninterruptible power supplies back up for safety alarms Battery management by intelligent systems and prediction of

battery life are dealt with in a dedicated chapter The topic of used battery collection and recycling with the description of

specific treatments for the different systems is also extensively treated in view of its environmental relevance Finally the

world market of these batteries is presented with detailed figures for the various applications Updated and full overview of

the power sources for industries Written by leading scientists in their fields Well balanced in terms of scientific and technical

information    **Electric and Hybrid Vehicles** Gianfranco Pistoia,2010-07-27 Electric and Hybrid Vehicles Power Sources

Models Sustainability Infrastructure and the Market reviews the performance cost safety and sustainability of battery

systems for hybrid electric vehicles HEVs and electric vehicles EVs including nickel metal hydride batteries and Li ion

batteries Throughout this book especially in the first chapters alternative vehicles with different power trains are compared

in terms of lifetime cost fuel consumption and environmental impact The emissions of greenhouse gases are particularly dealt

with The improvement of the battery or fuel cell performance and governmental incentives will play a fundamental role in

determining how far and how substantial alternative vehicles will penetrate into the market An adequate recharging

infrastructure is of paramount importance for the diffusion of vehicles powered by batteries and fuel cells as it may contribute to overcome the so called range anxiety. Thus proposed battery charging techniques are summarized and hydrogen refueling stations are described. The final chapter reviews the state of the art of the current models of hybrid and electric vehicles along with the powertrain solutions adopted by the major automakers. Contributions from the world's leading industry and research experts. Executive summaries of specific case studies. Information on basic research and application approaches.
