Chevrolet

TRUCK

SHOP MANUAL

FOREWORD

This manual is designed to provide the service man with complete information on the maintenance and repair of various units of the 1960 model Chevrolet trucks.

An effort has been made to produce a manual that will not only serve as a ready reference book for the experienced service man but also cover step-by-step procedure for the guidance of the less experienced man.

The Section Index on the title page enables the user to locate quickly any desired section. At the beginning of each section of two or more major subjects is a Table of Contents, which gives the page number on which each major subject begins. An Index is placed at the beginning of each major subject within the section, while a complete Alphabetical Index is provided at the end of the manual. This arrangement, we believe, will make it easy for the service man to locate the desired information.

Summaries of Special Tools are found at the end of each major section. Specifications covering vehicle components are presented in Section 16.

Maintenance information on 1960 Forward Control models is not included in this manual. All Forward Control information presented in the 1958-59 Truck Shop Manuals will also apply to the comparable 1960 models and reference should be made to these earlier publications.

This manual should be kept in a handy place for ready reference. If properly used, it will enable the mechanic to better serve the owners of Chevrolet trucks and thereby build or maintain a reputation for reliable service.

All information, illustrations and specifications contained in this literature are based on the latest product information available at the time of publication approval. The right is reserved to make changes at any time without notice.
