constellation of children's caregivers. Considered first are family systems and then successively mothers and fathers coparenting and gatekeeping between parents adolescent parenting grandparenting and single parenthood divorced and remarried parenting lesbian and gay parents and finally sibling caregivers and nonparental caregiving. Parenting also draws on transient and enduring physical personality and intellectual characteristics of the individual. The chapters in Part II on *Becoming and Being a Parent* consider the intergenerational transmission of parenting, parenting and contemporary reproductive technologies, the transition to parenthood and stages of parental development and then chapters turn to parents' well-being, emotions, self-efficacy, cognitions and attributions as well as socialization, personality in parenting and psychoanalytic theory. These features of parents serve many functions; they generate and shape parental practices, mediate the effectiveness of parenting and help to organize parenting.
