Designed for ease of use and quick reference Driver License Manuals Best Practices Deborah Meyers ((Of Partners In
Brainstorms, Inc.)),2005 Each motor vehicle jurisdiction in the United States has an established process by which it assesses
the required knowledge of driver license applicants to determine whether they are able to operate their vehicles safely and
thus qualify for a driver s license Corollary to that assessment process is the jurisdiction s responsibility to provide drivers
with the information for which they are to be held responsible during the licensing exam and subsequently while operating
their vehicle on our nation s roadways The primary means of providing this information to drivers is the jurisdiction s basic
driver license manual This study was directed at identifying best practices with regard to the basic driver license manuals
produced by motor vehicle jurisdictions To identify best practices three types of information sources were consulted 1 driver
license manuals produced by motor vehicle jurisdictions throughout the country 2 driver safety information produced by
relevant government agencies and private organizations and 3 research news education and popular literature Of 212
knowledge items recommended by the American Association of Motor Vehicle Administrators AAMVA for inclusion in driver
manuals 119 were addressed by a majority 51% or more of the manuals reviewed and are considered best practices in
subject matter content Additional topics that should be considered best practices in subject matter content are intersection
safety particularly with regard to red light running sharing the road with trucks particularly emphasis on their No Zones road
rage and aggressive driving driver distraction seatbelt usage particularly with regard to the jurisdiction s primary or
secondary seatbelt laws and following distance with emphasis on the need for a three or four second gap With regard to
factors other than subject matter content it was found that most jurisdictional manuals 77% are smaller than the 8 1 2 in x 11
in size of the Arizona manual with 48% opting for the compact 5 1 2 in x 8 1 2 in More than half the jurisdictions produce a
version of the manual in Spanish and more than a third of the jurisdictions produce a specialized driver manual directed at
