**Manual**

**Experiment No.1**

**Title:** - Study of different types of Network cables and practically implement the cross-wired cable and straight through cable using clamping tool.

**Objective:** - Students will understand concepts of Cabling

**S/W Requirement:** - NA

**H/W Requirement:** - RJ-45 connector, wire and clamping tool

**Step 1:** Strip the cable jacket about 1.5 inch down from the end.

**Step 2:** Spread the four pairs of twisted wire apart. For Cat 5e, you can use the pull string to strip the jacket farther down if you need to, then cut the pull string. Cat 6 cables have a spine that will also need to be cut.

**Step 3:** Untwist the wire pairs and neatly align them in the T568B orientation. Be sure not to untwist them any farther down the cable than where the jacket begins; we want to leave as much of the cable twisted as possible.

**Step 4:** Cut the wires as straight as possible, about 0.5 inch above the end of the jacket.

**Advanced System Modelling and Simulation with Block Diagram Languages** Nicholas M. Karayannakis, 1995-06-09

Advanced System Modelling and Simulation with Block Diagram Languages explores and describes the use of block languages in dynamic modelling and simulation. The application of block diagrams to dynamic modelling is reviewed not only in terms of known components and systems but also in terms of the development of new systems. Methods by which block diagrams clarify the dynamic essence of systems and their components are emphasized throughout the book and sufficient introductory material is included to elucidate the book's advanced material. Widely used continuous dynamic system simulation CDSS languages are analyzed and their technical features are discussed. This self-contained resource includes a review section on block diagram algebra and applied transfer functions both of which are important mathematical subjects relevant to the understanding of continuous dynamic system simulation.
