A Functional Discourse Grammar Theory of Grammaticalization Riccardo Giomi, 2023-02-13 In this volume long standing assumptions about the formal changes involved in grammaticalization are evaluated in the light of the striking diversity of human languages To this end the traditional notions of morphological coalescence syntactic fixation and phonological erosion are reassessed with regard to their relationship with the diachronic changes affecting the function of the construction and with larger scale typological changes that affect the language as a whole especially shifts in morphological type and word order patterns The author reaches the conclusion that suprasegmental phonological erosion and syntactic fixation redefined in a template based framework are direct consequences of functional change and are therefore significant indicators of grammaticalization whereas coalescence and segmental erosion are independently motivated by psycholinguistic rather than strictly grammatical factors
