## 2026 Guide Cli Fi Novel:

The Routledge Introduction to American Environmental Literature Alexander Menrisky,2026-03-12 The Routledge Introduction to American Environmental Literature offers an overview of the different ways diverse writers in the United States have represented the nonhuman world and human relationships with it from before the nation's founding to the present. Providing a concise introduction to ongoing trends and debates in literary environmentalism and the study of environmental representation, this accessible volume also covers a variety of topics including the transatlantic and transnational origins of American environmental literature, the development of the American wilderness ideal in nineteenth-century literature, the American nature writing tradition, the rise of ecological science and literary responses to it, the environmental justice movement and its literary expression, climate change and the emergence of climate fiction, ecopoetry and ecopoetics. Through readings of texts by authors such as Henry David Thoreau, John Muir, Mary Austin, Aldo Leopold, Rachel Carson, Edward Abbey, N. Scott Momaday, Simon Ortiz, Wendell Berry, Annie Dillard, Terry Tempest Williams, Helena Mar, a Viramontes, Octavia Butler, Jesmyn Ward, Louise Erdrich, Robin Wall Kimmerer, Tommy Pico, and more, this book examines the relationship between literature and its historical, sociopolitical, and environmental contexts and analyzes the relationship between environment and literary form. This volume is for students studying environmental literature, chiefly produced in or written about the context of the present-day United States. The text or selected chapters from it will be particularly useful in Literature and Environment, American Nature Writing, and Climate Writing courses offered most often in English departments.
