Healthcare climate energy consumption has been taken into the consideration of this research, because this sector has the highest energy consumption among other sectors. The report of 2010 on climate change of Ministry of Environment of the Netherlands has been considered in this research. This research has been done in a qualitative and quantitative "twofold" manner. Energy consumption in medical energy supply (MSES) of the Netherlands in 2010 and demand of energy of green hospitals, health professionals and patients for their health services have been considered through the use of these measures. The use of potential measures in this report is for enhancement of energy and health and sustainable environment by an agreement with Copenhagen goals. Although several studies have made the agreement to enhance of these measures, these agreement is synthesized under this research and some have not been mentioned in this report.
