Excerpt: Shifting Commodity Markets in a

Globalized World Mr.Rabah Arezki,Mr.Akito Matsumoto,2017-09-22 This paper discusses developments and prospects for energy metals and food markets since the early 2000s the start of what is termed a commodities supercycle the rise of commodity prices over a decade or more as a result of a rapid urbanization and an expansion of infrastructure

Macroeconomists often assume that technological innovation is exogenous driven largely by external factors or forces but this volume documents how innovation in energy markets is directly affected by prices When oil natural gas or fossil fuels become scarce prices increase This stimulates innovation and the adoption of new technologies and techniques for recovery and use of these resources Conversely when these commodities are abundant prices fall slowing the pace of innovation and the adoption of new techniques At the heart of international trade in commodities are cross country differences in resource endowments Natural resources are materials or substances that occur in nature and can be used for economic gain and so these include not only reserves of hydrocarbons minerals fisheries and forests but also temperate weather fertile land and access to water which are important to agriculture

The United States in the World Economy Martin

Feldstein,2008-04-15 The United States in the World Economy offers the results of a conference organized by the National Bureau of Economics in 1987 The volume includes background papers prepared by nine academic economists personal statements by individuals prominent in government and business and summaries of the discussion that followed the presentations Among the topics considered are foreign competition in Latin America and the Asian Pacific Rim Third World debts innovations in international financial markets changing patterns of international investment international capital flows and international competition in goods services and agriculture Prepared for a sophisticated but non technical audience these papers present complicated economic issues clearly indicating the many ways in which the American economy influences and is influenced by economic events and conditions around the world

Commodity Policies Alasdair I. MacBean,D. T. Nguyen,2024-02-01 Originally published in 1987 this book discusses the key issues concerned with primary commodity trade worldwide Primary commodities are crucially important for many developing countries because very often exports in just one or two primary commodities form the sole source of income for a developing country Developing countries need above all stability in primary commodities trade to guarantee their future development This book examines patterns of trade changing demand and the effects of fluctuations in spot and futures markets It analyses theories put forward to explain the problems and it reviews the research of the many international organisations which are concerned with the problems It examines the international agreements and bodies which have been set up to stabilise trade and assesses the performance of these agreements and organisations **China's Vulnerability**

Paradox Pascale Massot,2024-03-15 In China's Vulnerability Paradox Pascale Massot presents an original framework to examine the uneven transformations in global commodity markets resulting from the dramatic contemporary expansion of China's economy While one might expect China to be able to easily exert power in these markets Massot argues that China is actually quite vulnerable to external forces She zeros in on the relative position of China's market power across numerous major commodities in ore potash uranium and copper At a time of deepening US China tensions and debates about the future of the global economy this book provides an alternative understanding of the dynamics connecting the domestic political economy of large emerging economies and that of global markets
