

# Quarter 3 Math

Standard	Notes
3MD-1- Tell and write time to the nearest minute and measure time intervals in minutes (to the nearest 1 minute). Solve word problems involving addition and subtraction of time intervals in minutes (1 minutes intervals), e.g., by representing the problem on a number line diagram.	
3OA-7- Fluently multiply and divide within 100, using strategies such as the relationship between multiplication and division (e.g., knowing that $8 \times 5 = 40$ , one knows $40 \div 5 = 8$ ) or properties of operations. By the end of Grade 3, know from memory all products of two one-digit numbers. See table page 4 of this document.	In unit 3 the focus is on the multiplication strategies "build down from 10" ( $\times 9$ ), "build up from 5" ( $\times 6$ ), and "use a known fact" ( $\times 8$ )
3OA-8- Solve two-step word problems using the four operations. Represent these problems using equations with a letter standing for the unknown quantity. Assess the reasonableness of answers using mental computation and estimation strategies including rounding.	This standard is limited to problems posed with whole numbers and having whole-number answers; students should know how to perform operations in the conventional order when there are no parentheses to specify a particular order.
3G-2- Partition shapes into parts with equal areas. Express the area of each part as a unit fraction of the whole. For example, partition a shape into 4 parts with equal area, and describe the area of each part as $\frac{1}{4}$ of the area of the shape.	
3NF-1- Understand a fraction $\frac{a}{b}$ as the quantity formed by $a$ part when a whole is partitioned into $b$ equal parts; understand a fraction $\frac{a}{b}$ as the quantity formed by $a$ parts of size $\frac{1}{b}$ .	
3NF-2- Understand a fraction as a number on the number line; represent fractions on a number line diagram. a. Represent a fraction $\frac{a}{b}$ on a number line diagram by defining the interval from 0 to 1 as the whole and partitioning it into $b$ equal parts. Recognize that each part has size $\frac{1}{b}$ and that the endpoint of the part based at 0 locates the number $\frac{1}{b}$ on the number line. b. Represent a fraction $\frac{a}{b}$ on a number line diagram by marking off $a$ lengths $\frac{1}{b}$ from 0. Recognize that the resulting interval has size $\frac{a}{b}$ and that its endpoint locates the number $\frac{a}{b}$ on the number line.

Webster,California State University, Sacramento,2013 The last implementation of state standards was in 1997 when

California and the rest of the country were in an economic climate that supported growth in so many aspects including education. In 2010 the state of California adopted new State Standards set forth by the federal and state governments. California teachers are tasked with implementing these standards; however, many teachers are not being provided with the necessary tools to support their teaching. With larger class sizes and little to no money, teachers are being asked to change in an environment that offers them little to no support. Common Core Standards are of the educational future in California. Due to the lack of financial support in buying new curriculum that aligns to these standards, teachers will have to rely on their own professional practices to help them implement these new standards. For the teachers in many districts, this means developing support lessons and materials that align with these new standards while using their old non-aligned curriculum as the base. This master's project will help teachers to bridge the curricular gap in the fractions unit of the third grade math curriculum. Macmillan McGraw Hill 2008. The project's supplemental lessons will coincide with the textbook lessons while at the same time aligning with the CCSS. This project includes written lesson plans that can be easily implemented by third grade teachers in my district and will assist them to be teaching based upon the new CCSS. Using the current third grade curriculum alongside the Common Core State Standards National Governor's Association Center for Best Practices and Council of Chief State School Officers NGA CCSSO 2010 as well as other fractions resources I developed supplemental fractions lessons that any teacher could use. In addition to the detailed lessons themselves, the project contains all instructional materials including student in-class worksheets and suggested assessments.
