**Common Knowledge?** Dariusz Jemielniak, 2014-05-14 With an emphasis on peer produced content and collaboration Wikipedia exemplifies a departure from traditional management and organizational models. This iconic project has been variously characterized as a hive mind and an information revolution attracting millions of new users even as it has been denigrated as anarchic and plagued by misinformation. Have Wikipedia's structure and inner workings promoted its astonishing growth and enduring public relevance? In **Common Knowledge** Dariusz Jemielniak draws on his academic expertise and years of active participation within the Wikipedia community to take readers inside the site illuminating how it functions and deconstructing its distinctive organization. Against a backdrop of misconceptions about its governance, authenticity and accessibility Jemielniak delivers the first ethnography of Wikipedia revealing that it is not entirely at the mercy of the public instead it balances open access and power with a unique bureaucracy that takes a page from traditional organizational forms. Along the way Jemielniak incorporates fascinating cases that highlight the tug of war among the participants as they forge ahead in this pioneering environment

**Contesting Memorial Spaces of Japan's Empire** Edward Boyle, Steven Ivings, 2024-09-19 Ongoing arguments over how histories are honoured as evidenced by the conflict between South Korea and Japan over the opening of Tokyo's Heritage Information Centre in June 2020 reveal the extent to which heritage processes enable states to assert legitimacy and power on a global stage Here Contesting Memorial Spaces of Japan's Empire shines a timely spotlight on the complicated histories and disputed legacies of various sites associated with Japan's empire in Asia and the Pacific Bringing together a team of international scholars this transnational study sees contested memorial spaces as windows for us to explore how borders are created moved and altered in everyday life From the Asan Bay Overlook Memorial Wall in Guam and the Puppet Emperor Palace in China to Japan's Ainu Museum and the Cowra War Cemetery in Australia the diverse range of

case studies examined here foreground the complex relationship Japan and its neighbours have with their imperial past and reveal how these relations stand at the intersection of individual actions societal choices and memory collectives In doing so this innovative collection of essays bridges history geography and heritage studies to provide an invaluable new approach to the study of imperial conflict and memory politics in modern Japan

**Different Shades of the Past**

Mateusz Kamionka, Przemysław Łukasik, 2023-01-30 In his book 21 Lessons for the 21st Century the historian Yuval Noah Harrari wrote that man had the possibility to conquer the world precisely because he could create fictional stories and believe in them People created more and more complex stories about themselves that served and continue to serve according to the professor of the University of Jerusalem building unity social harmony and gaining power A narrative about past in which memory fragmentation and victimisation play a large role may be a temptation to instrumentalise the past This is especially true in relation to the events of the twentieth century when a series of bloody war conflicts occurred As shown in the following post conference volume today the wars of the past World War I and World War II Indian Pakistani war and current conflicts Russo Ukrainian war war in Sudan or Nagorno Karabakh are also a catalyst for the process of instrumentalisation This process can be analysed both at the level of the evolution of the language of conflict including the erosion of the values of democratic dialogue and the use of specific means of commemorating the past monuments museums the Internet

**Liquid Organization** Jerzy Kociatkiewicz, Monika Kostera, 2014-03-14 Widely known as a leading intellectual Zygmunt Bauman's thinking is often categorized as sociology or philosophy But his work has been hugely influential in other fields as well not least within organization studies From increasing management control and growing standardization of work activities to the increase in uncertainty and insecurity experienced by contemporary workers organizations themselves are becoming ever more ephemeral entities Bauman's themes globalization liquid modernity and postmodern ethics are arguably fundamental to contemporary notions of organization and management and his thinking has never been more relevant However despite the obvious and continuing influence of Bauman's ideas on business studies there has been no comprehensive attempt to chart his impact on organization theory In this innovative and insightful collection an international selection of leading management scholars explore key topics in current organizational discourse including networked organizations control and ambiguity technologies work and responsibility extending Bauman's liquid modernity to the liquid organization The book will be essential reading for scholars and academics and students in management and organizational theory and also sociology managing culture and organizational ethnography

**Thick Big Data**

Dariusz Jemielniak, 2020-03-25 The social sciences are becoming datafied The questions once considered the domain of sociologists are now answered by data scientists operating on large datasets and breaking with methodological tradition for better or worse The traditional social sciences such as sociology or anthropology are under the double threat of becoming marginalized or even irrelevant both from new methods of research which require more computational skills and from

increasing competition from the corporate world which gains an additional advantage based on data access However unlike data scientists sociologists and anthropologists have a long history of doing qualitative research The more quantified datasets we have the more difficult it is to interpret them without adding layers of qualitative interpretation Big Data therefore needs Thick Data This book presents the available arsenal of new methods and tools for studying society both quantitatively and qualitatively opening ground for the social sciences to take the lead in analysing digital behaviour It shows that Big Data can and should be supplemented and interpreted through thick data as well as cultural analysis Thick Big Data is critically important for students and researchers in the social sciences to understand the possibilities of digital analysis both in the quantitative and qualitative area and to successfully build mixed methods approaches *Finding Female Voice* Olusola Ajibade,2009
