Religious Education in the Secondary School James D. Holt, 2014-12-08 Religious Education in the Secondary School is a comprehensive straightforward introduction to the effective teaching of Religious Education in the secondary classroom. Acknowledging the highly valuable yet often misunderstood contribution of RE, this text shows how the subject can be taught in a way that explores the impact of religion on the lives of people and society, engaging pupils and preparing them to become individuals who celebrate and respect diversity. It is illustrated throughout with ideas for teaching at different key stages and offers expert chapters introducing you to both the World Religions and the core aspects of effective teaching and learning. With an emphasis on developing an understanding of the importance and different ways of meeting the learning needs of all pupils, key chapters cover Understanding different pedagogies of RE, Spirituality and RE, Tips on effective planning and assessment, An approach to teaching across the Key Stages, Core subject knowledge in Buddhism, Christianity, Hinduism, Islam, Judaism and Sikhism. Written by an experienced teacher, teacher educator and examiner, Religious Education in the Secondary School is a succinct compendium and has a real classroom applicability, offering all trainee RE teachers as well as those teaching Religious Education as specialists or non-specialists a wealth of support and inspiration.

Dialogue and Conflict on Religion. Studies of Classroom Interaction in European Countries Ina ter Avest, Dan-Paul Jozsa, Thorsten Knauth, Javier Rosón, Geir Skeie, 2009 Regarding teaching about religions and worldviews, there is a gap between the ambitions of educational policies and our knowledge about what really happens in the classroom. Research on classroom interaction about religion is not very far developed, either nationally or as international and as comparative research. There is a growing awareness, however, that research on pupils' perspectives on religion in education is needed in order to develop sustainable approaches for future education and this book is a contribution to this research. The classroom can be seen as an arena both for learning and for micro-politics. This arena is shaped and sometimes challenged and restricted or even curtailed by the wider societal and political context. In this book we present studies of classroom interaction that focus on the micro-sociological level of research. The studies presented open up a rather unexplored field of international comparative research on religion in education and the role of diversity for classroom interaction, giving deeper insights into what happens in
