Hart, 2008-02-28 Why do students continue to dissect animals in biology classes Why despite the excellence of teaching
resources for veterinary and human medical education that substitute for dissection do those provided for pre college
students fall short in convenience flexibility and coordination with the curriculum Why Dissection Animal Use in Education
looks beyond the typical yes or no debate about dissection to understand how we came to our current practice of dissection
in intermediate and high school biology even as preparation of health professionals has moved away from dissection Despite
the many forces that support the continued use of dissection in pedagogy teachers retain much autonomy in how they teach
in the classroom and legislation in many states provide specific requirements for what should and should not be taught in
separated science and health curricula offering students the option to not engage in dissection Why Dissection walks
students teachers and parents through these options to help them make more informed choices regarding their science
