Mechanics from Aristotle to Einstein Michael J. Crowe,2007 Mechanics the science of moving bodies and their interactions is among the finest accomplishments of western civilization This is the story of development from the ground breaking attempts of the Greeks through the brilliant abstractions of medieval logicians to the breathtaking achievements of Galileo Huygens and Newton to the dazzling virtuosity of Maxwell and Einstein Crowe s presentation allows the reader to appreciate this story from the inside following the thoughts of the original authors in their own words Ample commentary places these scientific giants in their context and helps modern readers understand the unfamiliar modes of expression of earlier times In the course of telling the story this book also provides a practical introduction to mechanics with sample computations and problems in both classical physics and relativistic kinematics
