## Features/Benefits

**30HR,HS units are designed for easy installation and maintenance**

Starting with installation, these machines keep costs low. Each is completely factory engineered and assembled to ensure a perfectly balanced refrigeration system that can be installed with minimal field labor. Only external fluid and power connections need to be completed at the jobsite to make the fluid-cooled (30HR) units operational. Condenserless (30HS) units require the addition of a remote condenser.

The 30HR model is a packaged unit complete with cooler, condensers, compressors, controls, refrigerant and oil charge, and internal piping and wiring. The 30HS unit is a condenserless version of the basic 30HR, shipped with a holding charge of refrigerant and specially designed for applications with remote fluid- or air-cooled, or evaporative type, condensers. All the easy-rigging 30H series chillers are extremely trim and compact. They can pass easily through standard doorways, and require minimal floor space on the job.
