Advances in technology and changes in the way we communicate must also be explained to new users through technical writing. The young adults of today will be the job force of tomorrow so choosing a career that will best fit with the needs of the changing world will be important to job satisfaction and a successful life. With the vast array of career and job options it will also be important for young adults to understand which work will be the best match for their interests, talents, goals, and personality types. Certain careers are expected to gain importance within the early decades of the twenty-first century. According to the U.S. Bureau of Labor Statistics, jobs in freelance or technical writing are on track to grow faster than the average rate for all occupations. If you love to express yourself with the written word, a career in freelance or technical writing might be the right choice for you. You can still write a great novel in your free time. *Ecotrain Green Career Guide Almanac*, 2010-03-15 *Careers in Focus: Alternative Energy, Third Edition* Ferguson, 2021-06-01

Kammen,2008-11 The New Apollo Energy Project by coordinating public and private policies and investments provides the vision for a cleaner domestically based and more secure 21st century energy system This report provides an invaluable comparison of the many recent studies that show how a shift towards clean energy technologies will result in significant job creation These studies confirm that supporting renewable and efficient energy systems will create more American jobs than would a comparable investment in traditional fossil fuel based systems Moreover an investment agenda in emerging clean energy technologies would also reduce our foreign trade deficit and reestablish the U S as a leader in this growing international market Illustrations

**Green Energy Jobs in the US** E. Mark Curtis,2022 Does the growth of renewable energy benefit US workers and which workers stand to benefit the most Until now evidence on green energy jobs has been limited due to measurement issues We use data on nearly all jobs posted online in the US as collected by Burning Glass Technology and we create a new measure of green jobs defined here as solar and wind jobs We use job titles and task requirements to define green jobs We find that both solar and wind job postings have more than tripled since 2010 with solar jobs seeing especially strong growth that precedes the growth of new installed solar capacity In 2019 we identify approximately 52 500 solar job openings and 13 500 wind job

openings Solar jobs are mostly 33% in sales occupations and in the utilities industry 16% Wind jobs are most represented among installation and maintenance occupations 37% and in the manufacturing industry 29% Green jobs are created in occupations that are about 21% higher paying than average The pay premium is even higher for jobs with a low educational requirement Finally green jobs tend to locate in counties with high shares of employment in fossil fuel extraction Overall our results suggest that the growth of renewable energy leads to the creation of relatively high paying jobs which are more often than not located in areas that stand to lose from a decline in fossil fuel extraction jobs

**The Green Energy Boom: A Global Quest for Money, Power and Energy** Jean Missinhoun, 2020-11-23 In the 20th century we built our daily existence around the production and consumption of fossil fuels Our use of oil has given us more jobs leisure time cheaper goods and affordable travel just to name a few benefits Oil has made our lives richer and more efficient But it came at a cost The latest catastrophe COVID 19 Jean Missinhoun is a hedge fund investor based in London who focuses on oil and energy investments Up until the COVID 19 crisis Missinhoun focused on dealings with Brent crude oil as well as options and futures But as the pandemic continued to expand he realized the world has two choices continue down the destructive path of fossil fuels or make the transition to green energy Our exploration of renewable energy has the same potential to be just as fruitful as oil was a century ago if not more so And with the help of artificial intelligence who knows what new materials or inventions we ll make next as we embark on the 21st century The trillion dollar question is who will be the next Rockefeller
